Hypothesis: Write a hypothesis about how the frequency of dominant and recessive alleles in a population may change over several generations.

Example hypothesis: Over several generations, dominant alleles will become more common and recessive alleles will become less common.

Prediction: Based on your hypothesis, write a prediction about the frequency of F alleles and f alleles in the rabbit population after 10 generations. (Rabbits with the ff genotype in each generation die but survive.)

Example prediction: After 10 generations, the frequency of F alleles will be much greater than the frequency of f alleles.

Usage Table: Sample data shown below.
