Predictive Computing and Information Security P.K. Gupta, Vipin Tyagi, S.K. Singh, 2017-09-27 This book describes various methods and recent advances in predictive computing and information security It highlights various predictive application scenarios to discuss these breakthroughs in real world settings Further it addresses state of art techniques and the design development and innovative use of technologies for enhancing predictive computing and information security Coverage also includes the frameworks for eTransportation and eHealth security techniques and algorithms for predictive computing and information security based on Internet of Things and Cloud computing As such the book offers a valuable resource for graduate students and researchers interested in exploring predictive modeling techniques and architectures to solve information security privacy and protection issues in future communication

Robot Intelligence Technology and Applications 6 Jinwhan Kim, Brendan Englot, Hae-Won Park, Han-Lim Choi, Hyun Myung, Junmo Kim, Jong-Hwan Kim, 2022-03-31 This book aims at serving the researchers and practitioners in related fields with a timely dissemination of the recent progress on robotics and artificial intelligence This book is based on a collection of papers presented at the 9th International Conference on Robot Intelligence Technology and Applications RiTA held at KAIST in Daejeon Korea in a hybrid format on December 16 17 2021 Humankind is getting through the third year of COVID 19 pandemic While this pandemic has made everyone's life so challenging it has also expedited transition of our everyday lives into a new form often called the new normal Although many people often use the terminology perhaps we still do not have a consensus about what it is and what it should be like One thing that is clear is that robotics and artificial intelligence technologies are playing critical roles in this phase transition of our everyday lives We see last mile delivery robots on the street AI embedded service robots in the restaurants uninhabited shops non face to face medical services conferences and talks in metaverses and AI based online education programs For better readability the total of 53 papers are grouped into four chapters Chapter I Motion Planning and Control Chapter II Design and Robot Application Chapter III Sensing Perception and Recognition and Chapter IV Cognition Autonomy and Intelligence For those who have research on robot intelligence technology we believe this book will help them understand the recent robot technologies and applications and enhance their study

Advances in Guidance, Navigation and Control Liang Yan, Haibin Duan, Xiang Yu, 2021-11-12 This book features the latest theoretical results and techniques in the field of guidance navigation and control GNC of vehicles and aircraft It covers a range of topics including but not limited to intelligent computing communication and control new methods of navigation estimation and tracking control of multiple moving objects manned and autonomous

unmanned systems guidance navigation and control of miniature aircraft and sensor systems for guidance navigation and control Presenting recent advances in the form of illustrations tables and text it also provides detailed information of a number of the studies to offer readers insights for their own research In addition the book addresses fundamental concepts and studies in the development of GNC making it a valuable resource for both beginners and researchers wanting to further their understanding of guidance navigation and control **Field and Service Robotics** Peter Corke, Salah

Sukkarieh, 2006-07-25 The 5th International Conference on Field and Service Robotics FSR05 was held in Port Douglas Australia on 29th 31st July 2005 and brought together the worlds leading experts in field and service automation The goal of the conference was to report and encourage the latest research and practical results towards the use of field and service robotics in the community with particular focus on proven technology The conference provided a forum for researchers professionals and robot manufacturers to exchange up to date technical knowledge and experience Field robots are robots which operate in outdoor complex and dynamic environments Service robots are those that work closely with humans with particular applications involving indoor and structured environments There are a wide range of topics presented in this issue on field and service robots including Agricultural and Forestry Robotics Mining and Exploration Robots Robots for

Construction Security Defence Robots Cleaning Robots Autonomous Underwater Vehicles and Autonomous Flying Robots This meeting was the fifth in the series and brings FSR back to Australia where it was first held FSR has been held every 2 years starting with Canberra 1997 followed by Pittsburgh 1999 Helsinki 2001 and Lake Yamanaka 2003 Autonomous Vehicle Navigation Lounis Adouane, 2015-12-15 Autonomous vehicles are no longer just a fixture of science fiction This book introduces a new effective approach to controlling autonomous vehicles in cluttered environments using reactive and multi controller architecture Techniques to address different complex tasks when navigating one vehicle in a cluttered environment as well as the coordination of a group of vehicles navigating within a geometric formation in a cluttered environment are extensively covered Researchers in robotics control and electrical engineering will find this book informative and engaging *Service Oriented, Holonic and Multi-Agent Manufacturing Systems for Industry of the Future*

Theodor Borangiu, Damien Trentesaux, Paulo Leitão, 2023-02-01 The scientific theme of the book is Virtualisation a multifaceted key enabler of Industry 4 0 from holonic to cloud manufacturing which is addressed in the framework of cyber physical system development The book approaches cyber physical systems for manufacturing with emergent digital technologies Internet of Things digital twins based on the virtualization of production models embedded in the design virtual commissioning optimization and resilience of processes and fault tolerance of resources big data cloud control and computing machine learning and cobots that are applied in the book s chapters to industry and service sectors such as manufacturing energy logistics construction and health care The novelty of this approach consists in interpreting and applying the characteristics of RAMI4 0 the reference architecture model of the Industry 4 0 framework as combinations of

virtualized cyber physical system elements and IT components in life cycle value stream models The general scope of the book is to foster innovation in smart and sustainable manufacturing and logistics systems and in this context to promote concepts methods and solutions for the digital transformation of manufacturing through service orientation in holonic and agent based control with distributed intelligence The book s readership is comprised by researchers and engineers working in the manufacturing value chain area who develop and use digital control solutions in the Industry of the Future vision The book also addresses to master s and Ph D students enrolled in Engineering Sciences programs *Recent Developments in Model-Based and Data-Driven Methods for Advanced Control and Diagnosis* Didier Theilliol,Józef Korbicz,Janusz

Kacprzyk,2023-07-15 The book consists of recent works on several axes either with a more theoretical nature or with a focus on applications which will span a variety of up to date topics in the field of systems and control The main market area of the contributions include Advanced fault tolerant control control reconfiguration health monitoring techniques for industrial systems data driven diagnosis methods process supervision diagnosis and control of discrete event systems maintenance and repair strategies statistical methods for fault diagnosis reliability and safety of industrial systems artificial intelligence methods for control and diagnosis health aware control design strategies advanced control approaches deep learning based methods for control and diagnosis reinforcement learning based approaches for advanced control diagnosis and prognosis techniques applied to industrial problems Industry 4 0 as well as instrumentation and sensors These works constitute advances in the aforementioned scientific fields and will be used by graduate as well as doctoral students along with established researchers to update themselves with the state of the art and recent advances in their respective fields As the book includes several applicative studies with several multi disciplinary contributions deep learning reinforcement learning model based data based control etc the book proves to be equally useful for the practitioners as well industrial professionals

Computational Intelligence for Pattern Recognition Witold Pedrycz,Shyi-Ming Chen,2018-04-30 The book presents a comprehensive and up to date review of fuzzy pattern recognition It carefully discusses a range of methodological and algorithmic issues as well as implementations and case studies and identifies the best design practices assesses business models and practices of pattern recognition in real world applications in industry health care administration and business Since the inception of fuzzy sets fuzzy pattern recognition with its methodology algorithms and applications has offered new insights into the principles and practice of pattern classification Computational intelligence CI establishes a comprehensive framework aimed at fostering the paradigm of pattern recognition The collection of contributions included in this book offers a representative overview of the advances in the area with timely in depth and comprehensive material on the conceptually appealing and practically sound methodology and practices of CI based pattern recognition *Cutting Edge Robotics* ,2010
