

Behavior Rating Inventory of Executive Function, Second Edition (BRIEF-2)

The BRIEF-2 is a standardized questionnaire designed to specifically measure the range of behavioral manifestations of executive function in school-age children (5 to 18 years old). The BRIEF-2 is designed to be completed by parents, teachers, or students (self ratings). It provides ratings of behaviors related to various executive functions observed in the home and in the school setting across five domains (Inhibition, Shift, Emotional Control, Working Memory, and Plan/Organization). The BRIEF-2 includes three summary scales: Behavior Regulation Index, Inattention Regulation Index, and Cognitive Regulation Index. It also includes the Global Executive Composite (GEC), overall score.

T-Scores and Percentiles are classified according to the following table:
