Designing for Democracy Jennifer Forestal, 2022 How should we fix digital technologies to support democracy instead of undermining it In *Designing for Democracy* Jennifer Forestal argues that accurately evaluating the democratic potential of digital spaces means studying how the built environment a primary component of our modern public square structures our activity shapes our attitudes and supports the kinds of relationships and behaviors democracy requires While many scholars and practitioners are attentive to the role of design in shaping behavior they have yet to fully engage with the question of what structures are required to support democratic communities and how to build them Forestal closes this gap by providing a new theory of democratic space Drawing from a wide range of disciplines including architecture psychology and the history of political thought she argues that democratic spaces must be designed with three environmental characteristics boundaries durability and flexibility that taken together afford users the ability to engage in fundamental civic practices Through extended analyses of Facebook Twitter and Reddit Forestal shows precisely how well these digital platforms meet the criteria for democratic spaces or whether they do so at all The result is a more nuanced analysis of the democratic communities that form or fail to emerge in these spaces as well as more concrete suggestions for how to improve them In connecting the built environment digital technologies and democratic theory *Designing for Democracy* provides blueprints for democracy in a digital age

Culture and Social Media Adam Acar, 2014-03-17 Currently more than half the population in developed countries has experienced online social networking What is more a quarter of the world s

citizens now have a profile in social media whose users number 1.47 billion. Although English speaking countries top the list of active social media using nations, people from all around the world are represented in online social network channels. Social media obviously is a global phenomenon, however, we don't know much about how each nation uses this tool and whether cultural values and demographic factors impact the usage behavior. This book discusses how culture relates to social media use around the world. Chapter 1 summarizes the recent impact of social media on our lives. Chapter 2 describes what social networks are and introduces online social networks. Chapter 3 and Chapter 4 focus on the theoretical aspects of social media. While Chapter 5 connects social media use and human communication, Chapter 6 looks at the effects of social media on society. Chapter 7 is about social innovations. Chapter 8 and 9 provide some basic information about Facebook and Twitter, the two most popular social media platforms, and Chapter 10 looks at the business aspects of social media. Chapter 11 reviews past studies on social media and culture, and Chapter 13 once again talks about Eastern and Western communication styles and how people in the East and West use social media. Chapter 14 compares and contrasts the way Americans and Japanese have been using social media. The last chapter provides a very brief summary of the book.

Network Propaganda Yochai Benkler, Robert Faris, Hal Roberts, 2018-09-17. This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. Is social media destroying democracy? Are Russian propaganda or Fake news entrepreneurs on Facebook undermining our sense of a shared reality? A conventional wisdom has emerged since the election of Donald Trump in 2016 that new technologies and their manipulation by foreign actors played a decisive role in his victory and are responsible for the sense of a post-truth moment in which disinformation and propaganda thrives. Network Propaganda challenges that received wisdom through the most comprehensive study yet published on media coverage of American presidential politics from the start of the election cycle in April 2015 to the one year anniversary of the Trump presidency. Analysing millions of news stories together with Twitter and Facebook shares, broadcast television and YouTube, the book provides a comprehensive overview of the architecture of contemporary American political communications. Through data analysis and detailed qualitative case studies of coverage of immigration, Clinton scandals and the Trump-Russia investigation, the book finds that the right-wing media ecosystem operates fundamentally differently than the rest of the media environment. The authors argue that longstanding institutional, political and cultural patterns in American politics interacted with technological change since the 1970s to create a propaganda feedback loop in American conservative media. This dynamic has marginalized centre-right media and politicians radicalized the right-wing ecosystem and rendered it susceptible to propaganda efforts, foreign and domestic. For readers outside the United States, the book offers a new perspective and methods for diagnosing the sources of and potential solutions for the perceived global crisis of democratic politics.
