Beyond The Walled City Colonial Exclusion In Havana:

Beyond the Walled City Guadalupe Garcia, 2016 Once one of the most important port cities in the New World Havana was a model for the planning and construction of other colonial cities This book tells the story of how Havana was conceived built and managed and explores the relationship between colonial empire and urbanization in the Americas Guadalupe Garcia shows how the policing of urban life and public space by imperial authorities from the sixteenth century onward was explicitly centered on politics of racial exclusion and social control She illustrates the importance of colonial ideologies in the production of urban space and the centrality of race and racial exclusion as an organizing ideology of urban life in Havana Beyond the Walled City connects colonial urban practices to contemporary debates on urbanization the policing of public spaces and the urban dislocation of black and ethnic populations across the region Provided by publisher [A Cuban City, Segregated](#) Bonnie A. Lucero, 2019-04-09 A microhistory of racial segregation in Cienfuegos a central Cuban port city Founded as a white colony in 1819 Cienfuegos Cuba quickly became home to people of African descent both free and enslaved and later a small community of Chinese and other immigrants Despite the racial ethnic and cultural diversity that defined the city's population the urban landscape was characterized by distinctive racial boundaries separating the white city center from the heterogeneous peripheries [A Cuban City Segregated Race and Urbanization in the Nineteenth Century](#) explores how the de facto racial segregation was constructed and perpetuated in a society devoid of explicitly racial laws Drawing on the insights of intersectional feminism Bonnie A Lucero shows that the key to understanding racial segregation in Cuba is recognizing the often unspoken ways specifically classed notions and practices of gender shaped the historical production of race and racial inequality In the context of nineteenth century Cienfuegos gender race and class converged in the concept of urban order a complex and historically contingent nexus of ideas about the appropriate and desired social hierarchy among urban residents often embodied spatially in particular relationships to the urban landscape As Cienfuegos evolved subtly over time the internal logic of urban order was driven by the construction and defense of a legible developed aesthetically pleasing and most importantly white city center Local authorities produced policies that reduced access to the city center along class and gendered lines for example by imposing expensive building codes on centric lands criminalizing poor peoples leisure activities regulating prostitution and quashing organized labor Although none of these policies mentioned race outright this new scholarship demonstrates that the policies were instrumental in producing and perpetuating the geographic marginality and discursive erasure of people of color from the historic center of Cienfuegos during its first century of existence **Intimations of Modernity** Louis A. Pérez Jr., 2017-01-11 Louis A Pérez Jr's new history of nineteenth century Cuba chronicles in fascinating detail the emergence of an urban middle class that was imbued with new knowledge and moral systems Fostering innovative skills and technologies these Cubans became deeply implicated in an expanding market culture during the boom in sugar production and prior to independence Contributing to the cultural

history of capitalism in Latin America Perez argues that such creoles were cosmopolitans with powerful transnational affinities and an abiding identification with modernity This period of Cuban history is usually viewed through a political lens but Perez here emphasizing the character of everyday life within the increasingly fraught colonial system shows how moral social and cultural change that resulted from market forces also contributed to conditions leading to the collapse of the Spanish colonial administration Perez highlights women's centrality in this process showing how criollas adapted to new modes of self representation as a means of self fulfillment Increasing opportunities for middle class women's public presence and social participation was both cause and consequence of expanding consumerism and of women's challenges to prevailing gender hierarchies Seemingly simple actions riding a bicycle for example or deploying the abanico the fan in different ways exposed how traditional systems of power and privilege clashed with norms of modernity and progress

Patchwork

Freedoms Adriana Chira, 2022-02-17 In nineteenth century Santiago de Cuba the island of Cuba's radical cradle Afro descendant peasants forged freedom and devised their own formative path to emancipation Drawing on understudied archives this pathbreaking work unearths a new history of Black rural geography and popular legalism and offers a new framework for thinking about nineteenth century Black freedom Santiago de Cuba's Afro descendant peasantries did not rely on liberal abolitionist ideologies as a primary reference point in their struggle for rights Instead they negotiated their freedom and land piecemeal through colonial legal frameworks that allowed for local custom and manumission While gradually wearing down the institution of slavery through litigation and self purchase they reimagined colonial racial systems before Cuba's intellectuals had their say Long before residents of Cuba protested for national independence and island wide emancipation in 1868 it was Santiago's Afro descendant peasants who gradually and invisibly laid the groundwork for emancipation

Havana

Susan Fitzgerald, 2022-05-01 Following the crisis of the Special Period Cuba promoted urban agriculture throughout its towns and cities to address food sovereignty and security Through the adoption of state recommended design strategies these gardens have become places of social and economic exchange throughout Cuba This book maps the lived experiences surrounding three urban farms in Havana to construct a deeper understanding about the everyday life of this city Using narratives and drawings this research uncovers these sites as places where education intimacy entrepreneurship wellbeing and culture are interwoven alongside food production Henri Lefebvre's latent work on rhythm analysis is used as a research method to capture the everyday beats particular to Havana surrounding these sites This book maps the many ways in which these spaces shift power away from the state to become places that are co created by the community to serve as a crucial hinge point between the ongoing collapse of the city and its future wellbeing

Nature,

Culture, and Race in Colonial Cuba Lee Sessions, 2024-06-18 A new and necessary examination of how nineteenth century Cuban white elites viewed the natural world material culture and political power as intertwined In the decades before the Cuban wars of independence white elites exploited the island's natural history and culture to redefine racial identity and

reassert authority These practices occurred in the face of challenges to their political power from Cubans of mixed race and as Cuba's dependence on sugar led to ecological and economic precarity Lee Sessions uses close visual analysis to investigate how white elites wielded power by manipulating material culture placing in conversation for the first time the natural history museums botanical gardens and thousands of paintings drawings and prints produced in and about Cuba from 1820 to 1860 This important and novel book explores how groups used material culture to imagine their own future at a moment when racial and political dynamics were changing rapidly while facing an ecological disaster of unimaginable scale

La Paz's Colonial Specters Luis Sierra, 2021-01-14 This original study examines a vital but neglected aspect of the 1952 National Revolution in Bolivia the activism of urban inhabitants Many of these activists were Aymara speaking people of indigenous origin who transformed the urban environment politics and place of indigenous and neighbors within the city of La Paz Luis Sierra traces how these urban residents faced racial discrimination and marginalization despite their political support for the Movimiento Nacionalista Revolucionario MNR La Paz's Colonial Specters reassesses the contingent relational nature of Bolivia's racial categories and the artificial division between urban and rural activists Building on rich established historiography on the indigenous people of Bolivia Luis Sierra breaks new ground in showing the role of the neighborhoods in the process of urbanization and builds upon analysis of the ways in which race gender and class discourse shaped migrants interactions with other urban residents Questioning how and why this multiclass and multi ethnic group continued to be labelled by elites and the state as un modern indigena the author uses La Paz to demonstrate the ways in which race class and gender intertwine in urbanization and in conceptions of the city and nation Of interest to scholars researchers and advanced students of Latin American history urban history the history of activism and the history of ethnic conflict this unique study covers the previously neglected first half of the 20th century to shed light on the urban development of La Paz and its racial and political divides

The ^AOxford Handbook of the Baroque John D. Lyons, 2019-08-08 Baroque the cultural period extending from the mid sixteenth to the mid eighteenth century created some of the world's most striking monuments music artworks and literature This Handbook goes beyond all existing studies by presenting Baroque not only as a style but also as a global cultural phenomenon arising in response to enormous religious political and technological changes

The Right to Live in Health Daniel A. Rodríguez, 2020-07-21 Daniel A Rodríguez's history of a newly independent Cuba shaking off the U S occupation focuses on the intersection of public health and politics in Havana While medical policies were often used to further American colonial power in Cuba Rodríguez argues they evolved into important expressions of anticolonial nationalism as Cuba struggled to establish itself as a modern state A younger generation of Cuban medical reformers including physicians patients and officials imagined disease as a kind of remnant of colonial rule These new medical

nationalists as Rodr guez calls them looked to medical science to guide Cuba toward what they envisioned as a healthy and independent future Rodr guez describes how medicine and new public health projects infused republican Cuba s statecraft powerfully shaping the lives of Havana s residents He underscores how various stakeholders including women and people of color demanded robust government investment in quality medical care for all Cubans a central national value that continues today On a broader level Rodr guez proposes that Latin America at least as much as the United States and Europe was an engine for the articulation of citizens rights including the right to health care in the twentieth century
