Beginning Groovy Grails And Griffon:

Beginning Groovy, Grails and Griffon Christopher M Judd, Joseph Faisal Nusairat, Jim Shingler, Vishal Layka, 2013-03-12 Web frameworks are playing a major role in the creation of today's most compelling web applications because they automate many of the tedious tasks allowing developers to instead focus on providing users with creative and powerful features. Java developers have been particularly fortunate in this area having been able to take advantage of Grails, an open source framework that supercharges productivity when building Java driven web sites. Grails is based on Groovy which is a very popular and growing dynamic scripting language for Java developers and was inspired by Python, Ruby and Smalltalk. *Beginning Groovy Grails and Griffon* is the first introductory book on the Groovy language and its primary web framework Grails. Griffon is also covered. While Grails is the Web framework for building Groovy Web applications, Griffon is the desktop framework for building desktop Groovy applications. Could Groovy be the new Java? It's light, fast and free, open source. This book gets you started with Groovy, Grails and Griffon and culminates in the example and possible application of some real world projects. You follow along with the development of each project, implementing and running each application while learning new features along the way. *Learn Java for Web Development* Vishal Layka, 2014-03-05 Web development is still one of today's most popular, active and important programming and development activities. From a single web page to an e-commerce enabled web site to a fully fledged web application, the Java programming language and its frameworks allow you great flexibility and productivity for your web application development. *Learn Java for Web Development* teaches web developers who are new to Java key skills, Java based languages and frameworks to build simple or complex web sites and applications. As soon as you pick up this book, Vishal Layka's experience guides you on a very practical learning and building journey. You will learn the Java nuts and bolts necessary to build a simple HelloWorld Java native application as well as a HelloWorld Java based web application example that utilizes servlets and Java Server Pages (JSPs). Over the course of the book, you'll learn more about servlets and JSPs and delve into Java Server Faces (JSFs) and the expression language found in each of these by applying them in a real world case study: a book store e-commerce application. Then you'll build your web application using Apache Struts2 and the Spring MVC framework. The book concludes by exploring the web application that you've built and examining industry best practices and how these might fit with your application as well as covering alternative Java Web frameworks like Groovy, Grails and Scala Play 2. You also can explore the basics of Java, Groovy and Scala in the book's appendices. While reading this book, you'll see all this in action and you can use it as a starting point for further Java web development. Study and experiment with the many source code examples and later apply them to your own web application building endeavors and 2:00 AM challenges. *Emerging Technologies for Education* Ting-Ting Wu, Rosella Gennari, Yueh-Min Huang, Haoran Xie, Yiwei Cao, 2017-02-17 This book constitutes the thoroughly refereed post-workshop proceedings of the First International Symposium SETE 2016 held in conjunction with ICWL 2016, Rome, Italy, in October.

2016 The 81 revised papers 59 full and 22 short ones were carefully reviewed and selected from 139 submission They cover latest findings in various areas such as emerging technologies for open access to education and learning emerging technologies supported personalized and adaptive learning emerging technologies support for intelligent tutoring emerging technologies support for game based and joyful learning emerging technologies of pedagogical issues emerging technologies for affective learning and emerging technologies for tangible learning
