Consider the vast array of things around you from the building you are in the lights illuminating the interior the computational devices mediating your life the music in the background even the crockery furniture and glassware you are in the presence of Common to all these objects is that their concrete visual and technological forms were invariably conceived modelled finished and tested in sites characterised as studios Remarkably the studio remains a peculiar lacuna in our understanding of how cultural artefacts are brought into being and how creativity operates as a located practice *Studio Studies* is an agenda setting volume that presents a set of empirical case studies that explore and examine the studio as a key setting for aesthetic and material production As such *Studio Studies* responds to three contemporary concerns in social and cultural thought first how to account for the situated nature of creative and cultural production second the challenge of reimagining creativity as a socio materially distributed practice rather than the cognitive privilege of the individual and finally to unravel the parallels contrasts and interconnections between studios and other sites

of cultural aesthetic and technoscientific production notably laboratories By enquiring into the operations topologies and displacements that shape and format studios this volume aims to demarcate a novel and important object of analysis for empirical social and cultural research as well to develop new conceptual repertoires to unpack the multiple ways studio processes shape our everyday lives
