Twice-Exceptional Boys Deborah Gennarelli, 2022-10-01 What happens in schools to children who are 2e Too often schools place focus on the disability and ignore the giftedness Because true abilities are not addressed and such children are placed with other educationally disabled children the gifted child loses the joy of learning The light goes out of his eyes While gifted girls are more likely to dumb down to fit in or withdraw into depression particularly if they are 2e and some boys may do the same more often the 2e boys develop behavior problems where they act out dramatically underachieve and engage in risky behaviors because they are frustrated and angry that their learning is stymied Some of these very bright young men may even end up in the juvenile justice system definitely the wrong environment for them As schools in the United States have swung toward an emphasis on science technology engineering and math STEM education the educational literature has taken a swing toward gender fairness as it relates to these fields Recent discussions include the fact that girls and women are underrepresented in STEM advanced coursework college degree programs and careers Because the discussions often focus on the reasons girls are excluded or why they sometimes exclude themselves from these endeavors boys are rarely mentioned The focus on girls has taken attention away from the fact that boys are experiencing equally troubling issues in school sometimes more so than girls According to the 2019 Digest of Education Statistics by the National Center for Education boys Were more likely to receive an out of school suspension Were expelled 2 1 2 times more than girls Were more likely to use illicit drugs Were twice as likely to be in a fight at school These inequalities also cross racial boundaries and appear to be more dramatic for minority boys Black boys were threatened or injured with a weapon at school more often than White boys Twice as many Black boys were expelled from school as compared to White boys Boys from minority and low income backgrounds are underrepresented in gifted education and over represented in special education

Paradigms of Gifted Education David Yun Dai, Fei Chen, 2021-09-03 This book highlights how to conduct research in gifted education when researchers have to choose from myriad theoretical ideas hypotheses claims practical models and strategies It shows researchers how to build clarity rigor and relevance into a research agenda that combats fragmentation and contributes to enhanced theoretical and practical endeavors in the field Specifically *Paradigms of Gifted Education* advocates a paradigmatic approach to conducting research in gifted education and shows how it can be done every step of the way by specifying the essential questions of What Why Who and How in a coherent manner and by selecting methods that are appropriate for the question asked and the phase of the research efforts To facilitate the development of a research agenda the book identifies three major paradigms of gifted education and 20 essential research

questions that would help move the field forward
