Belasting Vrijheid En Eigendom:

Belasting, vrijheid en eigendom F. H. M. Grapperhaus, 1989 Aan de hand van vijf perioden uit de geschiedenis wil de auteur laten zien hoe vorst en overheid gaandeweg gedwongen werden om in ruil voor belastingheffing steeds meer medezeggenschap te geven aan hun onderdanen

The Political Economy of the Dutch Republic Oscar Gelderblom, 2016-02-24 In the first half of the seventeenth century the Dutch Republic emerged as one of Europe's leading maritime powers. The political and military leadership of this small country was based on large scale borrowing from an increasingly wealthy middle class of merchants, manufacturers and regents. This volume presents the first comprehensive account of the political economy of the Dutch republic from the sixteenth to the early nineteenth century. Building on earlier scholarship and extensive new evidence, it tackles two main issues: the effect of political revolution on property rights and public finance, and the ability of the nation to renegotiate issues of taxation and government borrowing in changing political circumstances. The essays in this volume chart the Republic's rise during the seventeenth century and its subsequent decline as other European nations adopted the Dutch financial model and warfare bankrupted the state in the eighteenth century. By following the United Provinces's financial ability to respond to the changing national and international circumstances across a three hundred year period, much can be learned not only about the Dutch experience but the wider European implications as well.

Studies in the History of Tax Law, Volume 11 Peter Harris, Dominic de Cogan, 2023-09-21 This book is a continuation of the prestigious series which is drawn from the papers of the biennial Cambridge Tax Law History Conference. The authors are a mix of academics and senior tax professionals from the judiciary and practice with representatives from 9 countries. The series continues to investigate current tax policy debates in an historical context. The papers fall within 3 basic categories: 1 UK and Irish tax looking at a variety of topics such as tax administration, cases and judges; Whitney Singer Viscount Radcliffe: the taxation of royal forests; the taxation of spirits and income tax transition in the Irish Free State; 2 International taxation with chapters on the role of international organisations: OECD, League of Nations and on South Africa's early attempts to address double taxation, tax treaties; and 3 Non UK tax systems including chapters on the legacy of colonial influence: Dutch East Indies, early developments in China, New Zealand and the USA, an influential Canadian report, Carter Commission, development of the GAAR in Scandinavia and the receipt of Roman tax law in Europe.

State Communication and Public Politics in the Dutch Golden Age Arthur der Weduwen, 2024-07-19 *State Communication and Public Politics in the Dutch Golden Age* describes the political communication practices of the authorities in the early modern Netherlands. Der Weduwen provides an in-depth study of early modern state communication: the manner in which government sought to inform its citizens, publicise its laws and engage publicly in quarrels with political opponents. These communication strategies, including proclamations, the use of town criers and the printing and affixing of hundreds of thousands of edicts, underpinned the political stability of the seventeenth century Dutch Republic. Based on systematic research in thirty-two Dutch archives.

this book demonstrates for the first time how the wealthiest most literate and most politically participatory state of early modern Europe was shaped by the communication of political information It makes a decisive case for the importance of communication to the relationship between rulers and ruled and the extent to which early modern authorities relied on the active consent of their subjects to legitimise their government

Medieval Capital Markets Jaco Zuiderduijn, 2009-05-06

Institutions that allow for the accumulation of capital were as crucial to economic growth throughout history as they are today But whereas historians often focus on the precursors of modern banking institutions little is known of any alternatives that may have served similar purposes prior to their rise This study focuses on the institutional framework of markets for renten a type of long term debt that enabled economic development in much of Northwest Europe in the late Middle Ages In the county of Holland these markets allowed large segments of the public and private sectors to reallocate capital This study thus uncovers the medieval capital markets in the region that was to become the core of the Dutch Republic
