Business Model Innovation as a Dynamic Capability Marc Sniukas, 2020-07-21. This study adopts a dynamic capabilities perspective to explore the activities and processes through which business model innovations arise in established organisations. New and innovative business models are fundamental to the commercialisation of the latest technologies, performance and competitive advantage as well as value creation for customers, the focal company and its ecosystem. Yet our current understanding of how established companies design and implement new business models is limited by a lack of empirical research. Based on a review of relevant literature, business model innovation is presented and explored as a dynamic capability. The book subsequently uses proven methodologies to gather and analyse data from five case studies in the manufacturing, financial services, media, consulting and healthcare industries. The framework developed here offers a novel understanding of how business model innovations come about in established organisations, a practice it dubs 'crafting business models in statu nascendi'.

Reinventing Business Models Henk Wiltze, Volberda, Frans A. J. Van Den Bosch, Kevin Heij, 2018. Reinventing Business Models concentrates on the how and when of business model innovation. It provides managers with menus to outperform competitors and helps them choose between improving the existing business model and radically renewing it. The conclusions are supported by the authors' own research and case studies.

Business Model Innovation Daniela Andreini, Cristina Bettinelli, 2017-02-28. This book presents a systematic literature review of 156 published papers on business model innovation (BMI). The aim is to identify and integrate the different theoretical perspectives, analytical levels and empirical contexts in order to deepen understanding of this complex phenomenon. The authors conduct an inductive thematic analysis based on an informal ontological classification that identifies 56 key themes. Within each theme, discussion focuses on thematic patterns, potential inconsistencies and debates and future directions and opportunities for research. The book makes a number of significant contributions to the field. First, it offers a deeper understanding of the evolution of research on BMI through an ontological map that identifies the

key thematic areas in the literature Second a multilevel model is developed that clarifies the concept of BMI by identifying its drivers contingencies and outcomes Third the authors identify clear and specific directions for further research and offer suggestions on research design creating an informative road map for the future The book will be of value both to scholars and researchers and to practitioners
