students *The Limits of Family Influence* David C. Rowe,1994-01-01 Challenging firmly established assumptions about the influence of child rearing on the development of children s personalities and intelligence this book contends that there has been too heavy an emphasis on the family as the bearer of culture It draws from behavior genetic research to reveal how environmental variables such as social class parental warmth and one versus two parent households may be empty of causal influence on child outcomes The book examines the theoretical basis of socialization science and describes in great detail what behavior genetic studies can teach us about environmental influence *Neuromotor Mechanisms in Human Communication* Doreen Kimura,1993-05-06 This monograph is based on 20 years of research with patients who have experienced pathology in one hemisphere of the brain It deals with brain mechanisms in human communicative behavior and with related motor functions from a broadly biological point of view In so doing the work discusses the possible evolutionary origins of human communication the relation of brain mechanisms in communicative behavior to analogous nonhuman behaviors and the neural systems involved in various levels and kinds of communication In addition noncommunicative mechanisms which parallel those used in communication such as manual and oral praxis and constructional behavior are outlined in detail Individual differences in brain organization for such functions related to hand preference and sex are also explored Although there is extensive reference to central nervous system pathology the emphasis throughout is on how the findings contribute to understanding normal brain mechanisms Much new data is presented along with the theoretical treatment of human communication which emphasizes a behavioral rather than a linguistic approach This in turn provides continuity with nonhuman primates and early hominids The work will interest psycholinguists cognitive psychologists neurologists clinical neuropsychologists speech pathologists and advanced students in these fields [Why Men Want Sex and Women Need Love](#) Barbara Pease,Allan Pease,2010-01-12 Allan and Barbara Pease the international bestselling authors of *Why Men Don t Listen Women Can t Read Maps* deliver their most exciting book yet Will men and women ever see eye to eye about love and sex How will relationships ever be rewarding if men only want to rush into bed and women want to rush to the altar In this practical witty and down to earth guide couples experts Allan and Barbara Pease reveal the truth about how men and women can really get along By translating science and cutting edge research into a powerful yet highly entertaining read you ll learn how to find true happiness and compatibility with the opposite sex REVEALED IN THIS BOOK The seven types of love The top five things women want from men What to do when the chemistry is wrong What turns men and women on and off The most common New Relationship mistakes and how to avoid them How to decode manspeak If you want to get the most satisfaction from your relationship or are single and looking for the right person then you must read this book for the answer to *Why Men Want Sex and Women Need Love* **The Integrative Neurobiology of Affiliation** Carol Sue Carter,I. includes such associations as attachment parent offspring interactions pair bonding and the building of coalitions Affiliations provide a social matrix within which other behaviors including reproduction and aggression may occur While reproduction and aggression also reduce the distance between individuals their expression is regulated in part by the positive social fabric of affiliative behavior Until recently researchers have paid little attention to the regulatory physiology and neural processes that subserve affiliative behaviors The integrative approach in this book reflects the constructive interactions between those who study behavior in the context of natural history and evolution and those who study the nervous system The book contains the partial proceedings of a conference of the same title held in Washington DC in 1996 The full proceedings was published as part of the Annals of the York Academy of Sciences
