Chris,Lausch, Frederike**

Architecture Animal Human The Asymmetrical Condition:

Architecture, Animal, Human Catherine Ingraham, 2006 This book looks at specific instances in the Renaissance Enlightenment and our own time when architectural ideas and ideas of biological life come into close proximity with each other These convergences are fascinating and complex offering new insights into architecture and its role Establishing architecture as a product of the ascendancy of the position of human life the author shows here that while architecture is dependent on life forces for its existence at the same time it must be at some level indifferent to the life within it Life for its part privileges itself above all else and seeks to continuously expand its field of expression This then is the asymmetrical condition and to understand it is to gain important new theoretical perspectives into the nature of architecture

Architecture, Animal, Human Catherine T. Ingraham, 2006-02-02 This book looks at specific instances in the Renaissance Enlightenment and our own time when architectural ideas and ideas of biological life come into close proximity with each other These convergences are fascinating and complex offering new insights into architecture and its role Establishing architecture as a product of the ascendancy of the position of human life the author shows here that while architecture is dependent on life forces for its existence at the same time it must be at some level indifferent to the life within it Life for its part privileges itself above all else and seeks to continuously expand its field of expression This then is the asymmetrical condition and to understand it is to gain important new theoretical perspectives into the nature of architecture

Architecture, Animal, Human Catherine T. Ingraham, 2006-02-02 Considering the historical links between architecture and the development of life sciences this text focuses on particular times of great change in these disciplines and the complex relationships between life and the environments that life creates *Architectural Theories of the Environment* Ariane Lourie Harrison, 2013 These essays by architects theorists and sustainable designers together provide a framework to help you develop your own guidelines to approaching to your work Introductions define key terms and nine case studies demonstrate the concepts

The Funambulist Papers Léopold Lambert, 2013-10-23 This book is a collection of thirty five texts from the first series of guest writers essays written specifically for The Funambulist weblog from June 2011 to November 2012 The idea of complementing Lambert's own texts on his blog with those written by others originated from the idea that having friends communicate with each other about their work could help develop mutual interests and provide a platform to address an audience Thirty nine authors of twenty three nationalities were given the opportunity to write essays about a part of their work that might fit with the blog's editorial line Overall two families of texts emerged collected in two distinct parts in this volume The first part The Power of the Line explores the legal geographical and historical politics of various places of the world The second part Architectural Narratives approaches architecture in a mix of things that were once called philosophy literature and art This dichotomy represents the blog's editorial line and can be reconciled by the obsession of approaching architecture without care for the limits of a given discipline This method rather than adopting the contemporary architect's

syndrome that consists in talking about everything but being an expert in nothing attempts to consider architecture as something embedded within geo political cultural social historical biological and dromological mechanisms that widely exceed what is traditionally understood as the limits of its expertise *Animal Bodies, Renaissance Culture* Karen Raber, 2013-09-24 *Animal Bodies Renaissance Culture* examines how the shared embodied existence of early modern human and nonhuman animals challenged the establishment of species distinctions The material conditions of the early modern world brought humans and animals into complex interspecies relationships that have not been fully accounted for in critical readings of the period s philosophical scientific or literary representations of animals Where such prior readings have focused on the role of reason in debates about human exceptionalism this book turns instead to a series of cultural sites in which we find animal and human bodies sharing environments mutually transforming and defining one another s lives To uncover the animal body s role in anatomy eroticism architecture labor and consumption Karen Raber analyzes canonical works including More s *Utopia* Shakespeare s *Hamlet* and *Romeo and Juliet* and Sidney s poetry situating them among readings of human and equine anatomical texts medical recipes theories of architecture and urban design husbandry manuals and horsemanship treatises Raber reconsiders interactions between environment body and consciousness that we find in early modern human animal relations Scholars of the Renaissance period recognized animals fundamental role in fashioning what we call culture she demonstrates providing historical narratives about embodiment and the cultural constructions of species difference that are often overlooked in ecocritical and posthumanist theory that attempts to address the question of the animal *Architecture and Ugliness* Wouter Van Acker, Thomas Mical, 2020-01-09 Whatever ugliness is it remains a problematic category in architectural aesthetics alternately vilified and appropriated used either to shock or to invert conventions of architecture This book presents sixteen new scholarly essays which rethink ugliness in recent architecture from Brutalism to eclectic postmodern architectural productions and together offer a diverse reappraisal of the history and theory of postmodern architecture and design The essays address both broad theoretical questions on ugliness and postmodern aesthetics as well as more specific analyses of significant architectural examples dating from the last decades of the twentieth century The book attends to the diverse relations between the aesthetic register of ugliness and closely connected aesthetic concepts such as the monstrous the ordinary disgust the excessive the grotesque the interesting the impure and the sublime This volume does not simply document the history of a postmodern anti aesthetic through case studies Instead it aims to shed light on aesthetic problems that have been largely overlooked in the agenda of architectural theory This book answers in detail the questions How did postmodern architects appropriate troublesome contradictions bound to the raw ugliness of the real How have the ugly and the antiaesthetic been a productive force in postmodern architecture How can ugliness be of value to architecture And how can architecture make good use of ugliness

Architecture and Affect Lilian Chee, 2023-05-17 *Architecture and Affect* is motivated by two questions Why does

dismissed affective evidence trouble us What would it mean for architecture to assemble such discrepant evidence into its discourse Arguing that the persistent refrains of lived affect dwell in architecture this book traces such refrains to a concept of architecture wedged in the middle ground jammed amidst life things and events Rather than being aloof from its surrounds architecture in the midst challenges an autonomous epistemology Beyond accounting for the vivid but excluded this book develops a frame and a disposition for thinking critically about speculatively through and being grounded by encounter Examining affect through a constellation of spaces in contemporary Singapore it details architecture s uneasy but inextricable relationship with key subjects relegated to the incommensurate the peripheral the scenic and the decorative The outcome is a politicized architectural discourse simultaneously grounded and speculative bridging depth and intuition thinking and feeling

Utopia Computer. The "New" in Architecture? Bredella, Nathalie,Dähne, Chris,Lausch, Frederike,2023-05-31 The critical concern of the book Utopia Computer is the euphoria expectation and hope inspired by the introduction of computers within architecture in the early digital age With the advent of the personal computer and the launch of the Internet in the 1990s utopian ideals found in architectural discourse from the 1960s were revisited and adjusted to the specific characteristics of digital media Taking the 1990s discourse on computation as a starting point the contributions of this book grapple with the utopian promises associated with topics such as participation self organization and non standard architecture By placing these topics in a historical framework the book offers perspectives for the future role computation might play within architecture and society Die Publikation Utopie Computer thematisiert die Euphorie und die Erwartungen die mit der Einf hrung des Computers in der Architektur im fr hen digitalen Zeitalter verbunden sind Mit dem Aufkommen des Personal Computers und der kommerziellen Nutzung des Internets in den 1990er Jahren werden utopische Ideen die bereits den Architekturdiskurs der 1960er Jahre pr gten aufgegriffen und an die spezifischen M glichkeiten der digitalen Medien angepasst Ausgehend vom Diskurs eines computer basierten Entwerfens der 1990er Jahre setzen sich die Beitr ge dieses Buches mit Entwurfskonzepten der Nachkriegszeit auseinander Es werden Themen wie Partizipation Selbstorganisation oder Non Standard Architektur in einen historischen Kontext gesetzt und Perspektiven f r die zuk nftige Rolle des Computers in der Architektur und Gesellschaft entwickelt

Deleuze and Architecture Helene Frichot,2013-05-20 Critiques the legacy and ongoing influence of Deleuze on the discipline and practice of architecture This collection looks critically at how Deleuze challenges architecture as a discipline how architecture contributes to philosophy and how we can come to understand the complex politics of space of our increasingly networked world Since the 1980s Deleuze s philosophy has fuelled a generation of architectural thinking and can be seen in the design of a global range of contemporary built environments His work has also alerted architecture to crucial ecological political and social problems that the discipline needs to reconcile

As recognized, adventure as without difficulty as experience more or less lesson, amusement, as with ease as promise can be gotten by just checking out a book **Architecture Animal Human The Asymmetrical Condition** furthermore it is not directly done, you could undertake even more all but this life, all but the world.

We have the funds for you this proper as capably as simple artifice to get those all. We meet the expense of Architecture Animal Human The Asymmetrical Condition and numerous books collections from fictions to scientific research in any way. in the midst of them is this Architecture Animal Human The Asymmetrical Condition that can be your partner.
