Against Architecture Franco La Cecla, 2012-01-11 First published in 2008 as *Contro l architettura* Against Architecture has been translated into French and Greek with editions forthcoming in Polish and Portuguese The book is a passionate and erudite charge against the celebrities of the current architectural world the archistars According to Franco La Cecla architecture has lost its way and its true function as the archistars use the cityscape to build their brand putting their stamp on the built environment with no regard for the public good More than a diatribe against the trade for which he trained Franco La Cecla issues a call to rethink urban space to take our cities back from what he calls Casino Capitalism which has left a string of failed urban projects from the Sagrera of Barcelona to the expansion of Columbia University in New York City He finds hope and some surprising answers in the 2006 uprisings in the Parisian suburbs and in wandering the streets of San Francisco La Cecla recounts his peregrinations whether as a consultant to urban planners or as an incorrigible flaneur all the while giving insights into how we might find a way to resist the tyranny of the planners and find the spirit of place As he comments throughout on the works of past and present masters of urban and landscape writing including Robert Byron Mike Davis and Rebecca Solnit Franco La Cecla has given us a book that will take an important place in our public discourse

The Art of the City Raffaele Milani, 2017-12-12 In The Art of the City Raffaele Milani reflects on the ways in which inhabitants of the cityscape have

interacted on a spiritual psychological and philosophical level with the architecture that surrounds them Working with the premise that the city has a soul which is externalized in the physical structures of its urban space Milani expresses alarm in the face of sprawling megacities that typify the postmodern age and endanger the survival of cities distinctiveness While he laments that the nature surrounding cities is disappearing under concrete his concern is counterbalanced by the realization that there are ongoing projects of urban reclamation renewal and reutilization aimed at preserving an ancient almost mystical rapport between the citizen and the lived space Milani illustrates his argument by citing the works of modern architects including Emilio Ambasz Massimiliano Fuksas Frank Gehry Rem Koolhaas Kisho Kurokawa Daniel Libeskind and Renzo Piano Rather than a history of architecture *The Art of the City* is a compelling and timely reflection on the important challenge of insuring the continued liveability and aesthetic valorization of public spaces *Design through Dialogue* Karen A. Franck, Teresa von Sommaruga Howard, 2010-02-15 Completed projects receive more public attention than the process of their creation and so the myth that architects design buildings alone lives on In fact architects work with a great many others and the relationships that develop particularly with clients have a significant impact on design *Design through Dialogue* explores the relationship between client and architect through the lens of four overlapping activities that occur during any project relating talking exploring and transforming Cases of design and collaboration range from smaller scale retail residential and educational projects in the US Sweden the UK and the Pacific Rim to large institutions including Seattle's Central Library the National Museum of the American Indian in Washington DC the Supreme Court in Jerusalem and the Museum of New Zealand Material is taken from interviews with clients and architects and research in psychotherapy group dynamics and design studies Throughout the book aspects of process are linked to design outcomes to illustrate how architects and clients collaborate creatively *Building Art* Paul Goldberger, 2017-11-14 From Pulitzer Prize winning critic Paul Goldberger a full fledged critical biography of Frank Gehry undoubtedly the most famous architect of our time Fascinating An informative startling journey into the inner sanctums of modern architecture's power structure *The New York Times Book Review* Riveting Full of little known facts about the Pritzker Prize winner that will surprise the most knowledgeable Gehryophile Architectural Digest Goldberger follows Gehry from his humble origins the son of working class Jewish immigrants in Toronto to the heights of his extraordinary career He explores Gehry's relationship to Los Angeles a city that welcomed outsider artists and profoundly shaped him in his formative years He surveys the full range of his work from the Bilbao Guggenheim to the Walt Disney Concert Hall in L A to the architect's own home in Santa Monica which galvanized his neighbors and astonished the world He analyzes his carefully crafted persona in which an amiable surface masks a driving ambition And he discusses his use of technology not just to change the way a building looks but to revolutionize the very practice of the field Comprehensive and incisive *Building Art* is a sweeping view of a singular artist and an essential story of architecture's modern era **Leading with Aesthetics** Mahesh Daas, 2015-07-16 Leading with

Aesthetics The Transformational Leadership of Charles M Vest at MIT examines the role of aesthetics design and architecture in organizational transformation and leadership particularly in the context of academic institutions Leadership has been thus far predominantly examined from the perspective of function performance and position in the organizational structure such as a CEO or a president Relatively little work has been done in studying leadership of academic institutions let alone from the perspective of aesthetics both of which this book aims to rectify Although aesthetic dimension is important in any organizational context it is particularly important for academic institutions Leading with aesthetics would empower leaders in any organizational setting Daas examines the aesthetic dimension of transformational leadership through an eclectic blend of lenses drawn from the fields of architecture political science organizational aesthetics and organizational psychoanalysis A detailed case study of the leadership of Charles Marsteller Vest 1941 2013 who served as the president of Massachusetts Institute of Technology for fourteen years between 1990 and 2004 illustrates the importance of the aesthetic dimension in leadership and organizational change They Told Me Not to Take that Job Reynold Levy, 2015-05-12 When Reynold Levy became the new president of Lincoln Center in 2002 New York Magazine described the situation he walked in to as a community in deep distress riven by conflict Ideas for the redevelopment of Lincoln Center s artistic facilities and public spaces required spending more than 1.2 billion but there was no clear pathway for how to raise that kind of unprecedented sum The individual resident organizations that were the key constituents of Lincoln Center the Metropolitan Opera the New York City Opera the New York Philharmonic the Juilliard School and eight others could not agree on a common capital plan or fundraising course of action Instead intramural rivalries and disputes filled the vacuum Besides some of those organizations had daunting problems of their own Levy tells the inside story of the demise of the New York City Opera the Metropolitan Opera s need to use as collateral its iconic Chagall tapestries in the face of mounting operating losses and the New York Philharmonic s dalliance with Carnegie Hall Yet despite these and other challenges Levy and the extraordinary civic leaders at his side were able to shape a consensus for the physical modernization of the sixteen acre campus and raise the money necessary to maintain Lincoln Center as the country s most vibrant performing arts destination By the time he left Lincoln Center had prepared itself fully for the next generation of artists and audiences They Told Me Not to Take That Job is more than a memoir of life at the heart of one of the world s most prominent cultural institutions It is also a case study of leadership and management in action How Levy and his colleagues triumphantly steered Lincoln Center through perhaps the most tumultuous decade of its history to a startling transformation is fully captured in his riveting account
