Schoenberg and Hollywood
Modernism Kenneth H. Marcus, 2016-01-14 Schoenberg is often viewed as an isolated composer who was ill at ease in exile In this book Kenneth H Marcus shows that in fact Schoenberg's connections to Hollywood ran deep and most of the composer's exile compositions had some connection to the cultural and intellectual environment in which he found himself He was friends with numerous successful film industry figures including George Gershwin Oscar Levant David Raksin and Alfred Newman and each contributed to the composer's life and work in different ways helping him to obtain students making recordings of his music and arranging commissions While teaching at both the University of Southern California and the University of California Los Angeles Schoenberg was able to bridge two utterly different worlds the film industry and the academy Marcus shows that alongside Schoenberg's vital impact upon Southern California Modernism through his pedagogy compositions and texts he also taught students who became central to American musical modernism including John Cage and Lou Harrison

Street Level: Los Angeles in the Twenty-First Century Rob Sullivan, 2016-04-01 In the latter part of the C20th a series of seminal books were written which examined Los Angeles by the likes of Reyner Banham Mike Davis Edward Soja Allen Scott Michael Dear Frederick Jameson Umberto Eco Bernard Henri Levy and Jean Baudrillard which have been

hugely influential in thinking about cities more broadly The debates which were generated by these works have tended to be very heated and either defensive or offensive in approach A sufficient amount of time has since passed that a more measured approach to evaluating this work can now be taken The first section of this book *Contra This and Contra That* provides such a critique of the various theories applied to Los Angeles during the last century balancing the positive with the negative The second part of the book is an investigation of L A as it exists on the ground today While political the theoretical stance taken in this investigation is not mounted as a platform from which to advocate a particular ideology Instead it encompasses cultural as well as economic issues to put forth a view of L A which is coherent and cogent while at the same time considering its multi layered complex and ever changing qualities It concludes by arguing that sectorized off and totalizing visions of the city will not do as instruments of urban analysis and that only a theory as mobile as its target will do one that replicates the polymer nature of this place It proposes that extending that theory to the world beyond this particular city only a theory that models itself on the mobile and polymer nature of the world while still retaining a sense of the actual and the real will do as an instrument with which to comprehend the world In doing so this book is not only a model by which to think through Los Angeles but as a model by which to think through other world cities
