studies stimulated by the business turn in American religious history Other chapters show how evangelicals joined neo liberal economic practice and right wing politics to religious fundamentalism to consolidate wealth and power and how they developed marketing campaigns and organizational strategies that transformed the American religious landscape Included are essays exposing the moral compromises religious organizations have made to succeed as centers of wealth and influence and the religious beliefs that rationalize and justify these compromises Still others examine the application of business practices as a means of sustaining religious institutions and expanding their reach and look at controversies over business practices within religious organizations and the adjustments such organizations have made in response Together the essays collected here offer new ways of conceptualizing the interdependence of religion and business in the United States establishing multiple paths for further study of their intertwined historical development
