Higher Education Outcomes Assessment for the Twenty-First Century Peter Hernon, Robert E. Dugan, Candy Schwartz, 2013-05-09 This book discusses recent trends in outcomes assessment, examines how state governments are reshaping the national discussion with higher education, and explains how libraries must respond to these changes. *Higher Education Outcomes Assessment for the Twenty-First Century* focuses on recent developments in outcomes assessment, especially from the perspectives of the federal government and state governments, as well as foundations concerned about the state of higher education. The authors identify the significant changes that these stakeholders call for, information that academic librarians and anyone following outcomes assessment need to be aware of, and interpret the discussions to identify implications for libraries. Building upon the foundation of knowledge presented in the previous two *Libraries Unlimited Outcomes Assessment in Higher Education* titles, this book provides readers with up-to-date coverage of topics such as the emerging metrics used to define student and institutional success, the increased importance of accountability, and the need to compare and assess the performance of programs and institutions rather than individual courses, and the shift in prioritizing student outcomes over student learning.

outcomes The authors also spotlight the critical need for libraries to fit their role within the national discussion and suggest ways in which library managers and directors can play a role in redirecting the discussion to their benefit **Handbook of College and University Teaching** James E. Groccia, Mohammed A. T. Henning, Darby M. Roberts, 2023-11-15 This second edition of Student Affairs Assessment Theory to Practice provides updated content that reflects current student affairs assessment practice and signals the direction in which the field is headed Chapters feature foundational concepts of assessment design outcomes and data collection methods while also addressing current topics in student affairs assessment such as the prevalence of data analytics through higher education and equity centered assessment In addition this volume further broadens the scope of the assessment process by highlighting the impact of culturally responsive ethics and Indigenous paradigms Ultimately this book provides student affairs staff with the grounding they need to integrate assessment into how they design and monitor the programs services and activities they create to contribute to students development A useful reference for implementing assessment of co curricular programs and services this book is an excellent guide for student affairs practitioners and experienced assessment professionals to develop their assessment skills and knowledge Outcomes-Based Program Review Marilee J. Bresciani Ludvik, 2023-07-03 Second Edition This book introduces the reader to the principles of assessment of student learning outcomes in the context of program review and illustrates how to implement a sustainable outcomes based assessment program review process based on over 30 case studies of exemplary practice across a range of institutional types Since publication of the first edition just over a decade ago the landscape of higher education has been transformed With the emergence of competency based education the questioning of the value of a post secondary degree the explosion of neuroscientific research the emphasis on metacognition as well as demographic changes in who is going to college and why new questions are being asked and new methods of collecting data have multiplied This new edition retains the goals of the first which is to inform institutional self reflection of how well the organization is achieving its intended purpose in a manner that is reflective adaptive and

collaborative but which recognizes today's changed environment. Among the new topics Marilee J. Bresciani and Ludvik introduce in this edition is how to appropriately connect outcomes-based program review (OBPR) to performance indicators and predictive analytics and develop meaningful new performance metrics to inform our understanding of the student experience. She also addresses the intersection of OBPR with competency-based assessment. This edition introduces the reader to new concepts and terminology and demonstrates the implications of neuroscientific research for learning and development and how that influences OBPR design. All the cases, a signature feature of the first edition to illustrate best practice, have been replaced for this edition. Bresciani and Ludvik postulate the importance of developing institutions as learning organizations where OBPR is designed collaboratively between student services, academic services, business services, professionals, and faculty. Each chapter concludes with key learning points as well as questions for organizational leadership to promote ongoing professional development as institutions implement OBPR practices that are appropriate for their specific contexts.
