Assessing The Educational Data Movement Technology Education Connections Tec:

Assessing the Educational Data Movement Philip J. Piety, 2015-04-25 For better or worse many educational decisions that were once a private matter of teachers or administrators are now based on information technology To be successful in this era educators need to know how to use data successfully for their purposes and to understand the social forces at work In this book the author draws on his unique background in education policy and information systems to provide valuable insights into the education data movement Using narratives of practice the text discusses many current topics including value added modeling for teacher evaluation big data and analytics longitudinal data systems open educational resources and new designs for teaching

Rethinking Education in the Age of Technology Allan Collins, Richard Halverson, 2018 The digital revolution in education is well under way with more and more learners plugged into the online world How can schools make the most of both the technology and the learning potential of today's born digital students In this new edition of their groundbreaking book Collins and Halverson argue that new technologies have transformed our workplaces our lives and our culture and it is time we take the next step to transform learning in and out of schools The authors show how over time public schooling was so successful that it became synonymous with education But new technologies risk making schools obsolete and this book explains why and how today's educators policymakers and communities must adapt to provide all learners with access to the new learning tools of the 21st century Allan Collins and Richard Halverson are not by any means arguing that teachers or schools should go away Rather they are saying that they should open their doors and windows connect to other real and virtual places be crucial tour guides and send their children on flights of fancy through our modern memory palaces From the Foreword by James Paul Gee Arizona State University The most convincing account I've read about how education will change in the decades ahead the authors' analyses are impressive fair minded and useful Howard Gardner Harvard Graduate School of Education from first edition

Data Literacy for Educators Ellen B. Mandinach, Edith S. Gummer, 2016-04-01 Data literacy has become an essential skill set for teachers as education becomes more of an evidence based profession Teachers in all stages of professional growth need to learn how to use data effectively and responsibly to inform their teaching practices This groundbreaking resource describes data literacy for teaching emphasizing the important relationship between data knowledge and skills and disciplinary and pedagogical content knowledge Case studies of emerging programs in schools of education are used to illustrate the key components needed to integrate data driven decisionmaking into the teaching curricula The book offers a clear path for change while also addressing the inherent complexities associated with change Data Literacy for Educators provides concrete strategies for schools of education professional developers and school districts
