*Architectural Representation and the Perspective Hinge* Alberto Pérez Gómez, Louise Pelletier, 1997 The authors focus on the implications of the tool of perspective for architectural representation arguing that tools of representation have a direct influence on the conceptual development of projects and generation of forms *Architectural Representation and the Perspective Hinge* Alberto Pérez-Gómez, Louise Pelletier, 2000 The relationship between the architectural representation and its intended product a building has undergone a profound transformation over the centuries Before the age of modern technology the systematically predictive role of architectural drawing so taken for granted today was less dominant in the evolution from architectural idea to built work The age of computer aided design has brought with it a stricter standard of fidelity However contemporary architecture need not simply accept the inevitability of a technological imperative This book demonstrates that representation is never a neutral tool or mere picture of a future building *The Architecture Annual 2007-2008. Delft University of Technology* Luisa Calabrese, 2009 The theme of this Architecture Annual is Realize in just one year the Faculty of Architecture and its staff in collaboration with internal and external designers were able to realize quite a lot an efficient and successful relocation to a temporary tent camp and a completely new faculty on Julianalaan preface

*Rethinking Media Change* David Thorburn, Henry Jenkins, 2004-09-17 The essays in Rethinking Media Change center on a variety of media forms at moments of disruption and cultural transformation The editors introduction sketches an aesthetics of media transition patterns of development and social dispersion that operate across eras media forms and cultures The book includes case studies of such earlier media as the book the phonograph early cinema and television It also examines contemporary digital forms exploring their promise and strangeness A final section probes aspects of visual culture in such environments as the evolving museum movie spectacles and the virtual window The contributors reject apocalyptic scenarios of media revolution demonstrating instead that media transition is always a mix of tradition and innovation an accretive process in which emerging and established systems interact shift and collude with one another *Consuming Architecture* Daniel Maudlin, Marcel Vellinga, 2014-03-05 Projecting forward in time from the processes of design and construction that are so often the focus of architectural discourse Consuming Architecture examines the variety of ways in which buildings are consumed after they have been produced focusing in particular on processes of occupation appropriation and interpretation Drawing on contributions by architects historians anthropologists literary critics artists film makers photographers and journalists it shows how the consumption of architecture is a dynamic and creative act that involves the creation and negotiation of meanings and values by different stakeholders and that can be expressed in different voices In so doing it challenges ideas of what constitutes architecture architectural discourse and architectural education how we understand and think about it and who can claim ownership of it Consuming Architecture is aimed at students in architectural education and will also be of interest to students and researchers from disciplines that deal with architecture in

terms of consumption and material culture      **Brunelleschi, Lacan, Le Corbusier** Lorens Holm, 2020-11-25 This well argued analytic text provides a greater understanding of spatial issues in the field of architecture Re interpreting the fifteenth century demonstration of perspective Lorens Holm puts it in relation to today s theories of subjectivity and elaborates for the first time the theoretical link between architecture and psychoanalysis Divided into three sections Brunelleschi Lacan Le Corbusier argues that perspective remains the primary and most satisfying way of representing form because it is the paradigmatic form of spatial consciousness Well illustrated with over 100 images this compelling book is a valuable study of this key aspect of architectural study and practice making it an essential read for architects in their first year or their fiftieth      **Spaces of Tolerance** Igea Troiani, Suzanne Ewing, 2021-03-28 Spaces of Tolerance addresses the topic of tolerance in architectural production Through examining the boundaries of where discourses practices and designs are considered publishable suitable to be made public or not the book exposes criteria and cultures which censor architecture so as to offer ways that architecture can be more inclusive and diverse for society at large The contributors to the book discuss disciplinary tolerances and constraints related to architecture and its interdisciplinary exchanges and modes of working physical spatial temporal and digital tolerance in material assemblages and production between drawing and building and social cultural and political tolerance and threats contingent on geography and history This timely book aims to look at extremities margins and marginality to explore acceptable levels and their fluctuations in deviation and divergence Chapters in the book involve ungendering unacculturating in disciplinary terms and diversifying the architectural practitioner writer editor reviewer and reader and retooling the instruments and tactics of architectural practice and theory They argue that tolerance in interdisciplinary research in architecture can cultivate more diverse and productive conversations The chapters in this book were originally published as a special issue of the journal Architecture and Culture

**The City Rehearsed** Christopher Heuer, 2009-06-02 The City Rehearsed offers an entirely new perspective on printed architecture in early modern Europe through the lens of Hans Vredeman de Vries It probes the geographical encounters of dozens of engravings with contemporary texts on architecture theatre urbanism art collecting even ethnography The Netherlandish polymath Hans Vredeman de Vries 1526 1609 devoted his entire career to the production of imaginary architecture Painter architect rhetorician perspective theorist festival designer and draughtsman Vredeman was active in Antwerp Amsterdam and Prague where he designed a mysterious body of architectural prints works which by the seventeenth century had influenced buildings from Tallinn to Peru Including Scenographiae 1560 and Perspective 1604 5 Vredeman s strange publications were among the most widely distributed Renaissance books on building and vision shipped to England Spain and even Mexico by 1600 This book the first sustained study of Vredeman in English shifts the focus of inquiry to look at the active role his prints played in the life of urban readers outside of a narrowly defined Flemish architectural history This is a study with clear interest for historians of art and the built environment and one with broader

contemporary resonances for changing definitions of European culture and identity in the present day      *Drawing Parallels* Ray Lucas, 2019-04-29 *Drawing Parallels* expands your understanding of the workings of architects by looking at their work from an alternative perspective. The book focuses on parallel projections such as axonometric, isometric and oblique drawings. Ray Lucas argues that by retracing the marks made by architects we can begin to engage more directly with their practice as it is only by redrawing the work that hidden aspects are revealed. The practice of drawing offers significantly different insights not easily accessible through discourse analysis, critical theory or observation. Using James Stirling, JJP Oud, Peter Eisenman, John Hejduk and Cedric Price as case studies, Lucas highlights each architect's creative practices which he analyses with reference to Bergson's concepts of temporality and creativity, discussing the manner in which creative problems are explored and solved. The book also draws on a range of anthropological ideas including skilled practice and enchantment in order to explore why axonometrics are important to architecture and questions the degree to which the drawing convention influences the forms produced by architects. With 60 black and white images to illustrate design development, this book would be an essential read for academics and students of architecture with a particular interest in further understanding the inner workings of the architectural creative process.

**Architecture and ekphrasis** Dana Arnold, 2020-10-20 *Architecture and ekphrasis* examines how eighteenth-century prints and drawings of antique architecture operated as representations of thought. Using original archival material, it considers the idea of the past in the period, specifically how it was discovered and described, and investigates how space and time inform visual ekphrasis or descriptions of architecture. The idea of embodiment is used to explore the various methods of describing architecture, including graphic techniques, measurement and perspective, all of which demonstrate choices about different modes of ekphrasis. This well-illustrated, accessibly written study will be of interest to academics and students working in a broad range of subject areas. It will also be an essential teaching tool for increasingly popular cross-disciplinary courses.
