Architecture And Revolution Contemporary Perspectives On Central And Eastern Europe:

Architecture and Revolution Neil Leach, 1999 Architecture and Revolution explores the consequences of the 1989 revolutions in Central and Eastern Europe from an architectural perspective It presents new writings from a team of renowned architects philosophers and cultural theorists from both the East and the West They explore the questions over the built environment that now face architects planners and politicians in the region They examine the problems of buildings inherited from the communist era some are environmentally inadequate many were designed to serve a now redundant social programme and others carry the stigma of association with previous regimes Contributors include Daniel Libeskind Bernard Tschumi Laura Mulvey Helene Cixous Andrew Benjamin and Frederic Jameson *Architecture and Revolution* Neil Leach, 2003-09-02 Architecture and Revolution explores the consequences of the 1989 revolutions in Central and Eastern Europe from an architectural perspective It presents new writings from a team of renowned architects philosophers and cultural theorists from both the East and the West They explore the questions over the built environment that now face architects planners and politicians in the region They examine the problems of buildings inherited from the communist era some are environmentally inadequate many were designed to serve a now redundant social programme and others carry the stigma of association with previous regimes Contributors include Daniel Libeskind Bernard Tschumi Laura Mulvey Helene Cixous Andrew Benjamin and Frederic Jameson *Cultural Landscapes of Post-Socialist Cities* Mariusz Czepczynski, 2016-04-22 The cultural landscapes of Central European cities reflect over half a century of socialism and are marked by the Marxists vision of a utopian landscape Architecture urban planning and the visual arts were considered to be powerful means of expressing the people s power However since the velvet revolutions of 1989 this urban scenery has been radically transformed by new forces and trends infused by the free market democracy and liberalization This has led to landscape cleansing and recycling as these former communist nations used new architectural functional and social forms to transform their urbanscapes their meanings and uses Comparing case studies from different post socialist cities this book examines the culturally conditional variations between local powers and structures despite the similarities in the general processes and systems It considers the contemporary cultural landscapes of these post socialist cities as a dynamic fusion of the old communist forms and new free market meanings features and democratic practices of global influences and local icons The book assesses whether these urbanscapes clearly reflect the social cultural and political conditions and aspirations of these transitional countries and so a critical analysis of them provides important insights **German Architecture for a Mass Audience** Kathleen James-Chakraborty, 2002-09-06 This book vividly illustrates the ways in which buildings designed by many of Germany s most celebrated twentieth century architects were embedded in widely held beliefs about the power of architecture to influence society German Architecture for a Mass Audience also demonstrates the way in which these modernist ideas have been challenged and transformed most recently in the rebuilding of central Berlin Pursuing

Sustainable Urban Development in North Korea Pavel P. Em, 2024-07-25 This volume employs an urban lens to provide a critical analysis of the North Korean style of sustainable urban development in the face of severe sanctions and a scarcity of vital resources With a focus on five major areas population economics architecture urban planning and culture the authors examine the preconditions that led to the emergence of ideas related to urban sustainability assess and reassess the trends in sustainable development brought about by market forces and recommend paths for their further intensification Since this work covers a variety of topics ranging from geomancy and social control to economic issues and green architecture both locally and in comparison with European post socialist cities and South Korea it will point to lessons that other countries could learn from This book will be a valuable reference for scholars researchers students and the general public who have a regional interest in North Korea Korean unification and East Asia as a whole and or a topical interest in urban studies urban sustainability and post socialist urban transformation

Loose Fit City Maurice Mitchell, Bo Tang, 2017-09-22 Drawn from a lifetime's experience of shared city making from the bottom up within rapidly expanding urban metabolisms in Delhi Mumbai Agra Kathmandu West Africa and London Loose Fit City is about the ways in which city residents can learn through making to engage with the dynamic process of creating their own city It looks at the nature and processes involved in loosely fitting together elements made by different people at different scales and times with different intentions into a civic entity which is greater than the sum of its parts It shows how bottom up learning through making can create a more vibrant and democratic city than the more flattened top down centrally planned factory made version Loose Fit City provides a new take on the subject of architecture defined as the study and practice of fitting together physical and cultural topography It provides a comprehensive view of how the fourth dimension of time fits loosely together with the three spatial dimensions at different scales within the human horizon so as to layer meaning and depth within the places and metabolism of the city fabric

The Sociology of Art David Inglis, John Hughson, 2017-09-16 What can Sociology add to our understanding of art This volume brings together a range of respected scholars in the field who demonstrate the many ways in which sociology can add to our understanding of artistic issues Covering all the major schools of thought and dealing with many different art forms the book offers the reader a comprehensive and accessible guide to an often complex area It will be an invaluable resource for students seeking to understand sociology's contributions to the study of artistic and aesthetic issues

Architecture and Freedom Owen Hopkins, 2018-04-09 Architects are facing a crisis of agency For decades they have seen their traditional role diminish in scope as more and more of their responsibilities have been taken over by other disciplines within the building construction industry Once upon a time we might have seen the architect as the conductor of the orchestra now he or she is but one cog in a vast and increasingly complex machine In an attempt to find a way out of this crisis there is growing debate about how architects might reassert the importance of their role and influence On one side of this argument are those who believe that architects must refocus their attention on the internal demands of the discipline On the other are those who

argue that architects must instead reacquaint themselves with what many still believe to be the discipline's core mission of advancing social progress and promoting the public good and at the same time the scope of their traditional disciplinary remit. At root, this question is fundamentally about freedom: about whether architects still possess it if they have ever done and whether it is possible to find the professional disciplinary and individual autonomy to be able to define the spheres of their own practice. Presenting a variety of views and perspectives, this issue of AD takes us to the heart of what freedom means for architecture as it adapts and evolves in response to the changing contexts in which it is practised in the 21st century. Contributors include Phillip Bernstein, Peggy Deamer, Adam Nathaniel Furman, Kate Goodwin, Charles Holland, Anna Minton, Patrik Schumacher, Alex Scott, Whitby Ines Weizman, and Sarah Wigglesworth. Featured architects: Atelier Kite, ScottWhitbyStudio, C S Architects, Anupama Kundoo, Noero Architects, Umbrellium, and Zaha Hadid Architects.

Paradigms in Computing David Jason Gerber, Mariana Ibanez, 2015-01-01. *Paradigms in Computing: Making Machines and Models for Design* Agency in Architecture brings together critical theoretical and practical research and design that illustrates the plurality of computing approaches within the broad spectrum of design and mediated practices. It is an interrogation of our primary field of architecture through the lens of computing and yet one that realizes a productive expanding of our medium's definition and boundaries. It is a compilation that purposefully promotes architecture's disciplinary reach and incorporations beyond the design and construction of buildings and cities. The book offers a glimpse into the wide range of positions and experiences that are shaping practice and discourse today. The work included in *Paradigms in Computing* is evidence that models for enquiry are many and proliferating. As digitalization and computation continue to infuse our processes with new tools and new design environments, some of the trends collected in this book will continue to be central to the production and speculation of architecture and others will in retrospect be recognized as the seeds of new or perhaps multiple paradigms. Included are essays and projects from Alisa Andrasek, Rachel Armstrong, Philip Beesley, Tom Bessai, Shajay Bhooshan, Brad Cantrel, Matias Del Campo, Pablo Eiroa, Marc Fornes, David Jason Gerber, Maria Paz Gutierrez, Alvin Huang, Jason Kelly, Johnson Simon, Kim Neil Leach, Greg Lynn, Elena and Anna Maria Manferdini, Alex McDowell, Phillippe Morel, Nick Puckett, Casey Reas, Alex Robinson, Jenny Sabin, Jose Sanchez, Patrik Schumacher, Kyle Steinfeld, Satoru Sugihara, Orkan Telhan, Kathy Velikov, and Geoffrey Thun. Tom Verebes, Leire Asensio Villoria, and David Mah, Jenny Wu, Eric Howeler, and Meejin Yoon, and Zaha Hadid Architects.

Russia Richard Anderson, 2015-11-15. This book offers a comprehensive account of Russia's architectural production from the late nineteenth century to the present, explaining how its architecture was both shaped by and came to embody Russia's rapid cultural, economic, and social revolutions over the past century. Richard Anderson looks at Russia's complex relationship to global architectural culture, exploring the country's central presence in the Rationalism and Constructivism movements of the 1920s as well as its role as a key protagonist during the Cold War. Looking deeply at Soviet Russia, he brings the relationship between architecture and socialism into focus through detailed case studies that situate

buildings and architectural concepts within the socialist milieu of Soviet society He tracks the way Russian architectural institutions departed from the course of modernism being developed in capitalist countries and he reappraises the architecture of the Stalin era and the final decades of the USSR Finally he traces the influence of Soviet conventions on contemporary Russian architecture which is now a more heterogeneous mix of approaches and styles and how it made a lasting and little known impact on territories extending from the Middle East to Central Asia and into China A bold new assessment of Russia's architectural legacy and contemporary contributions this book is a fascinating exploration of a tumultuous place and the creativity that has come from it
