Considering that in the linguistic market some translators and interpreters without corresponding university degrees are active it is easy to understand the demand of agencies for quality evidences On the one hand the stated requirements very often don't in any way prove that the agencies do indeed offer the necessary quality and on the other hand must offend qualified linguistics with a university degree Nobody asks a lawyer architect or surgeon for a CV before engaging him for a service Besides agencies try to pay the same lowest rates to any subcontractor and this doesn't make the situation any better Some agencies let non professionals do the work or service required just because they offer best rates This book explains the author's point of view

Process and Operation Planning G. Halevi, 2003-11-30 Process planning determines how a product is to be manufactured and is therefore a key element in the manufacturing process It plays a major part in determining the cost of components and affects all factory activities company competitiveness production planning production efficiency and product quality It is a crucial link between design and manufacturing In spite of the importance of process planning in the manufacturing cycle there is no formal methodology which can be used or can help to train personnel for this job Process planning activities are predominantly labor intensive depending on the experience and the skill and intuition of the planner and therefore often precludes a thorough analysis and optimization of the process plan which nearly always results in higher than necessary production costs delays errors and non standardization of processes Process planning is regarded as an art and not a science Research in the field of process planning has indicated that all experts have their own expertise and one expert's experience might be different from that of another It is rare therefore for two planners to produce the same process Each process will produce the part as specified although different processes will result in different processing times and costs The question is who is an expert By definition an expert is one having or manifesting the knowledge skill and experience needed for success in a particular field or endeavor or one who has acquired special skill in or knowledge and mastery of something
