Assessment And Treatment Of Childhood Problems A Clinicians Guide:

Assessment and Treatment of Childhood Problems, Second Edition Carolyn S. Schroeder, Betty N. Gordon, 2002-07-01
This popular book guides clinicians and students in assessing and treating common childhood problems. Written in a highly accessible style, the volume presents an overview of healthy development, examines risk and protective factors for psychopathology, and spells out a behaviorally oriented model of assessment and treatment planning for children aged 2-12. Each problem-focused chapter reviews the literature on the topic at hand and provides step-by-step guidelines for practice, illustrated with helpful case examples. Featuring appendices that describe widely used assessment instruments, the book also contains more than 20 reproducible measures, clinical forms, and parent handouts ready to photocopy and use.

Assessment and Treatment of Childhood Problems, Third Edition Carolyn S. Schroeder, Julianne M. Smith-Boydston, 2017-08-07
This highly accessible work, now thoroughly revised, has shown thousands of students and clinicians how to assess and treat children's emotional and behavioral difficulties from a developmental perspective. The authors provide a sound understanding of typical development, ages 2-12, and the risk and protective factors for psychopathology. Chapters on common psychological disorders and family stressors describe the nature of each problem, review evidence-based treatments, and offer step-by-step guidelines for intervention, illustrated with helpful case examples. A comprehensive framework for assessing children and planning treatment is used throughout. Purchasers get access to a Web page where they can download and print the book's 24 reproducible forms and handouts in a convenient 8 1/2 x 11 size. New to This Edition: Chapters on developmental disabilities and trauma. Significantly revised to reflect advances in assessment, treatment, and developmental psychopathology research. Additional material on pharmacological treatments in each disorder-specific chapter. Sibling rivalry chapter expanded to include difficulties with peers. Updated for DSM-5.

Mental Health Interventions with Preschool Children Robert D. Lyman, Toni L. Hembree-Kigin, 2013-11-11 Preschool children have been largely neglected in the mental health treatment literature, although research has established that many behavioral and emotional disorders in children result from events occurring during the preschool years or are first manifested during this period. This has occurred for several reasons. Traditional psychoanalytic thinking has considered preschoolers to be too psychologically immature for complete manifestations of psychopathology, and the limited language abilities of young children have complicated assessment procedures and made them less appropriate for treatment approaches that are largely verbal in nature. In addition, the developmental complexity of the preschool period has deterred many researchers from investigating clinical issues with this age group. Partly as a result of the lack of information on preschoolers in the literature, practitioners have historically been uncomfortable in conducting assessments and initiating treatment with young children. They have often adopted a wait-and-see attitude in which formal mental health diagnosis and treatment are not implemented until after the child's entry into school. Unfortunately, such a delay may mean wasting the time during which mental health interventions can be maximally effective. Recently, this attitude has changed, and practitioners now recognize the need for assessment and treatment of behavioral and emotional disorders early in life. What they require to assist them in the timely delivery of such services is information about assessment and treatment procedures specifically designed for preschoolers and with demonstrated efficacy with that age group.

Model Programs in Child and Family Mental Health Michael C. Roberts, 2014-02-04 This volume is the product of a combined effort to find programs of service delivery that demonstrably treat the varieties of mental health problems of children and their families. The Section on Clinical Child Psychology, APA Clinical Psychology Section I, and the Division of Child Youth and Family Services, APA Division 37, established a task force whose mission was to identify, provide recognition for, and disseminate information on such programs. Their findings are presented here. The opening chapter and each section overview chapter provide

orientations to the program descriptions and examine characteristics of exemplary interventions The targeted problems include child abuse and neglect school adjustment problems social problem solving problems autism and developmental disabilities conduct disorders and severe emotional problems children affected by disasters and trauma children whose parents are divorced children of teenage parents family dysfunction and parent child relationships oppositional defiant disorder and attention deficit disorder Settings for interventions in the model programs include schools mental health centers and family guidance clinics hospitals and pediatric practices group homes and sheltered workshops community centers family homes summer camps and coordinated systems of care The 18 programs described demonstrate the rationale for their interventions their targeted populations the type of staff and personnel various programmatic interventions aspects of the problems implementation of interventions and how the programs have been evaluated The needs for improved mental health services remain strong The supporting organizations and the members of the Task Force intend for the product of this project to be helpful in providing models for meeting those needs Current Catalog National Library of Medicine (U.S.),1992 First multi year cumulation covers six years 1965 70 **Clinician's Guide to the Assessment Checklist Series** Michael Tarren-Sweeney,2013-10-30 The Assessment Checklist series created by Michael Tarren Sweeney provides the world s first standardised caregiver report measures of a range of attachment and trauma related mental health difficulties experienced amongst children growing up in foster adoptive kinship and residential care This clinical manual provides essential guidance for child and adolescent mental health clinicians who use the Assessment Checklist measures including the Assessment Checklist for Children ACC the Assessment Checklist for Adolescents ACA and the Brief Assessment Checklists BAC as part of their specialized assessments of children and adolescents in care Split into three parts the book explores all aspects of using and interpreting the Checklist series Part 1 provides an overview of the Assessment Checklist measures the rationale for their development and instructions on how to use the measures for clinical assessment screening and treatment monitoring Part 2 provides expert guidance to clinicians on interpreting Assessment Checklist score profiles and provides detailed information about several specific types of mental health difficulties measured by them Part 3 describes the development and psychometric properties of the various Assessment Checklist measures including information about their validity and reliability It also introduces several new measures that are under development Ideal for clinical child psychologists child and adolescent psychiatrists child psychotherapists and clinical social workers looking to improve the quality and depth of their clinical assessments with children and adolescents this book provides essential guidance on professional use of the Assessment Checklist measures *Studyguide for Assessment and Treatment of Childhood Problems: a Clinician's Guide by Carolyn S.
