such accounts are embedded in a larger discussion on social inequality. Together the chapters make a powerful case for the importance of speaker-centred methodologies in multilingual and multilingualism research. The book is a rich source of theoretical and methodological reflections and will thus be a valuable resource for both experienced researchers and students beginning to explore biographical research methods. **The Multilingual Challenge** Ulrike Jessner-Schmid, Claire J. Kramsch, 2015-09-25 This collection of scholarly articles is the first to address the challenges of multilingualism from a multidisciplinary perspective. The contributors to this volume examine both the beneficial and the problematic aspects of multilingualism in various dimensions that is they address familial, educational, academic, artistic, scientific, historical, professional and geopolitical challenges. **Manual of Applied Romance Linguistics** Vera Mathieu, Julia Montemayor Gracia, Claudia Polzin-Haumann, 2025-06-16 This handbook provides a systematic overview, firstly of the basic concepts and secondly of current research topics and trends in Applied Romance Linguistics from a theoretical, methodological and empirical perspective. It takes account of both traditional and innovative research approaches. Following a general introduction to the field and its major topics, methods and objectives, the presentation is divided into four thematic sections: methods and methodology, language society and knowledge, language acquisition and language education, specialised communication and transfer. The volume is geared towards researchers, teachers and students working in the fields of linguistic and communication studies but also addresses the general public. It aims to provide useful information for anyone dealing with problems of language and communication in their professional or private lives and illustrates career options for graduates of Romance Linguistics. **The Routledge Handbook of Language Awareness** Peter Garrett, Josep M. Coll, 2017-11-06 The Routledge Handbook of Language Awareness is a comprehensive and informative overview of the broad field of language awareness. It contains a collection of state-of-the-art reviews of both established themes and new directions authored and edited by experts in the field. The handbook is divided into three sections and reflects the engaging diversity of language awareness perspectives on language teaching and teachers, language learning and learners and extending to additional areas of importance that are less directly concerned with language instruction. In their introductory chapter the editors provide valuable background to the language awareness field along with their summary of the chapters and issues covered. A helpful section giving further reading suggestions for each of the chapters is included at the end of the book. This volume is essential reading for graduate students and researchers working in the sphere of language awareness within applied linguistics, sociolinguistics and across the wider spectrum of language and communication. **Critical Applied Linguistics** Alastair Pennycook, 2021-06-28 Now in its second edition, this accessible guide and introduction to critical applied linguistics provides a clear overview of the problems, debates and competing views in language education, literacy discourse, analysis, language in the workplace, translation and other language-related domains. Covering both critical theory and domains of practice, the book is organized around five themes: the politics of knowledge, the politics of language, the politics of

difference the politics of texts and the politics of pedagogy Recognizing that a changing world requires new ways of thinking and that many approaches have watered down over time the new edition applies a sharp fresh look at established and new intellectual frameworks The second edition is comprehensively updated with additional research throughout and features new discussions of colonialism queer theory race and gender translanguaging and posthumanism With a critical focus on the role of applied linguists Pennycook emphasizes the importance of a situated collaborative perspective that takes the discussion away from questions of implementation and insists instead that critical applied linguistics has to be an emergent program from the contexts in which it works This landmark text is essential reading for students and researchers of applied linguistics multilingualism language and education TESOL and language and identity

Uncertainty in deliberate lexical interventions Mélanie Maradan, 2020-12-11 Language managers in their different forms language planners terminologists professional neologists have long tried to intervene in the lexical usage of speakers with various degrees of success Some of their lexical items partly penetrate language use others do not Based on electronic networks of practice of the Esperanto speech community Mélanie Maradan establishes the foundation for a new method to extract speakers' opinions on lexical items from text corpora The method is intended as a tool for language managers to detect and explore in context the reasons why speakers might accept or reject lexical items
