A Variational Approach to Nonsmooth Dynamics Samir Adly, 2018-02-19 This brief examines mathematical models in nonsmooth mechanics and nonregular electrical circuits including evolution variational inequalities complementarity systems differential inclusions second order dynamics Lur e systems and Moreau's sweeping process The field of nonsmooth dynamics is of great interest to mathematicians mechanicians automatic controllers and engineers The present volume acknowledges this transversality and provides a multidisciplinary view as it outlines fundamental results in nonsmooth dynamics and explains how to use them to study various problems in engineering In particular the author explores the question of how to redefine the notion of dynamical systems in light of modern variational and nonsmooth analysis With the aim of bridging between the communities of applied mathematicians engineers and researchers in control theory and nonlinear systems this brief outlines both relevant mathematical proofs and models in unilateral mechanics and electronics

Task-Space Sensory Feedback Control of Robot Manipulators Chien Chern Cheah, Xiang Li, 2015-04-09 This book presents recent advances in robot control theory on task space sensory feedback control of robot manipulators By using sensory feedback information the robot control systems are robust to various uncertainties in modelling and calibration errors of the sensors Several sensory task space control methods that do not require exact knowledge of either kinematics or dynamics of robots are presented Some useful methods such as approximate Jacobian control adaptive Jacobian control region control and multiple task space regional feedback are included These formulations and methods give robots a high degree of flexibility in dealing with unforeseen changes and uncertainties in its kinematics and dynamics which is similar to human reaching movements and tool manipulation It also leads to the solution of several long standing problems and open issues in robot control such as force control with constraint uncertainty control of multi fingered robot hand with uncertain contact points singularity issue of
