The background of the cover features an abstract geometric design. It includes several overlapping yellow shapes, including a large triangle in the top right and a long, narrow, translucent yellow band that runs diagonally across the lower half. A solid blue circle is positioned in the lower right quadrant, partially overlapping the yellow band. Four solid red rectangular bars are placed at the corners: one on the left edge, one on the right edge, and two at the bottom edge, one on each side.

Marklen E. Konurbaev,2018-02-08 This book applies phenomenological methodology to examine the transformations of messages as they pass from the mind to the linear world of human speech and then back again Rapid development of linguistic science in the second half of the 20th century and cognitive science in the beginning of the 21st century has brought us through various stages of natural human language analysis and comprehension from deep structures transformational grammar and behaviorism to cognitive linguistics theory of encapsulation and mentalism Thus drawing upon new developments in cognitive science philosophy and hermeneutics the author reveals how to obtain the real vision of life lurking behind the spoken word Applying methodology introduced by Edmund Husserl and developed by Martin Heidegger the author examines how we can see the living and dynamic essence of speech hidden in the world of linear linguistic strings and casual utterances This uniquely researched work will be a valuable resource for students and scholars of cognitive stylistics pragmatics and the psychology of language **The SAGE Handbook of Visual Research Methods**

and the Internet Alan Gross, Jonathan Buehl, 2016-12-05 The essays in *Science and the Internet* address the timely topic of how digital tools are shaping science communication. Featuring chapters by leading scholars of the rhetoric of science and technology, the volume fills a much needed gap in contemporary rhetoric of science scholarship. Overall, the essays reveal how digital technologies may both fray the boundaries between experts and non experts and enable more collaborative democratic means of public engagement with science. The Routledge Handbook of Digital Writing and Rhetoric Jonathan Alexander, Jacqueline Rhodes, 2018-04-27 This handbook brings together scholars from around the globe who here contribute to our understanding of how digital rhetoric is changing the landscape of writing. Increasingly all of us must navigate networks of information composed not just with computers but an array of mobile devices. Increase our technological literacy and understand the changing dynamics of authoring, writing, reading and publishing in a world of rich and complex texts. Given such changes and given the diverse ways in which younger generations of college students are writing, communicating and designing texts in multimediated electronic environments we need to consider how the very act of writing itself is undergoing potentially fundamental changes. These changes are being addressed increasingly by the emerging field of digital rhetoric, a field that attempts to understand the rhetorical possibilities and affordances of writing broadly defined in a wide array of digital environments. Of interest to both researchers and students, this volume provides insights about the fields of rhetoric, writing, composition, digital media, literature and multimodal studies.
