An Introduction to Building Procurement Systems Jack Masterman, 2003-09-02 First Published in 2003 Building procurement systems are the organizational structures needed to design and construct building projects The intention of this guide is to provide the construction professional with sufficient information about building procurement systems to ensure an awareness of the main methods that are currently available and their principal advantages and disadvantages Chapters 1 and 2 describe the concept and categorization of procurement systems and the evolution of the methods currently in use The next four chapters deal with each of the various categories and the individual systems themselves The needs of clients are examined in Chapter 7 in the context of project success Chapter 8 investigates the way in which clients decide which procurement method to use The author then identifies the principles governing the current choice and the various aids that are available to assist clients during this decision process Finally in Chapter 9 the author attempts to forecast the future of procurement systems and their use This clear well researched and well structured guide will be invaluable to students and practising construction professionals alike as they work with a range of building procurement systems to choose the system most suited to their needs

Introduction to Building Procurement Brian Greenhalgh, Graham Squires, 2011-01-11 The procurement stage of the building process is critical to the success of any building project and as such must be understood by everybody entering the industry Introduction to Building Procurement is designed to familiarize the novice with the principles and methods of building procurement starting at the most basic level With chapter summaries and tutorial questions provided throughout the book the reader will get to grips with the following topics the structure of the construction industry the nature of clients the historical development of building procurement methods the roles and responsibilities carried out in any project Having developed the necessary background knowledge the reader is then introduced to the more complex aspects of procurement in detail such as methods of paying contractors the main procurement routes in use standard forms of contract The concluding chapter discusses emerging procurement trends and speculates on future developments to bring the reader right up to speed with the modern industry With its clear layout and highly accessible approach Introduction to Building Procurement is the perfect introductory text for undergraduate students and professionals starting out on a career in quantity surveying construction project management or construction commercial management

Procurement Systems Steve Rowlinson, Peter McDermott, 2005-10-09 This book deals with best practice in construction procurement the process by which customers of the construction industry go about procuring new facilities

Advances in Building Technology M.

Anson,J.M. Ko,E.S.S. Lam,2002-11-14 This set of proceedings is based on the International Conference on Advances in Building Technology in Hong Kong on 4 6 December 2002 The two volumes of proceedings contain 9 invited keynote papers 72 papers delivered by 11 teams and 133 contributed papers from over 20 countries around the world The papers cover a wide spectrum of topics across the three technology sub themes of structures and construction environment and information technology The variety within these categories spans a width of topics and these proceedings provide readers with a good general overview of recent advances in building research

Building Services Procurement Christopher Marsh,2003-09-02 Procurers and contractors increasingly need practical guidance for the strategic procurement of building services Clients seeking to improve the delivery performance of the construction industry are increasingly using alternative procurement arrangements These modern arrangements attempt to deliver a more strategic approach to achieving value for money Yet little thought is ever given to the strategic importance of building services No other single aspect of a project will affect project success more than the timely delivery of a fully functioning services installation Beyond the normal considerations of time cost and quality building services have a series of unique requirements not normally considered For the first time these unique requirements are combined in a single text providing the reader with the definitive guide to building services procurement The text reviews each of the major critical success factors and clearly explains the supporting processes that must be enacted to ensure success It reviews the general nature of procurement systems and construction projects and then explores the increasing importance that building services play both in the construction process and in determining success for the client Each significant stage within the procurement process is explored by explaining its importance and showing what decisions need to be made to develop a cohesive strategy It concludes by giving a step by step guide to clearly develop and implement a building services procurement strategy

The procurement strategies for the Olympic Stadium and the Aquatic Centre for the London 2012 Olympic Games Dirk von Plessen,2018-06-26 The International Olympic Committee announced on the 6th July 2005 that the Games of the 30th Olympiad in 2012 will take place in the city of London This study aims to determine whether the procurement strategies chosen by the ODA are the right choice for delivering the two main venues in the Olympic Park in time on budget and to the required quality In order to answer this question the approach of this study is to undertake extensive research in the subject area of construction procurement and to identify best practice in making procurement decisions for a project In particular the procurement strategies chosen by the ODA will be researched and their shortcomings identified Based on this theoretical framework the author will be able to undertake a systematic analysis of the decisions made by the ODA to procure the two most prestigious venues in the Olympic Park As a main part of this analysis the author will conduct semistructured interviews with key people involved in the Olympics and with experts of MSc Management in Construction the industry
