A New History of Modern Computing Thomas Haigh, Paul E. Ceruzzi, 2021-09-14 How the computer became universal Over the past fifty years the computer has been transformed from a hulking scientific supertool and data processing workhorse remote from the experiences of ordinary people to a diverse family of devices that billions rely on to play games shop stream music and movies communicate and count their steps In *A New History of Modern Computing* Thomas Haigh and Paul Ceruzzi trace these changes A comprehensive reimagining of Ceruzzi's *A History of Modern Computing* this new volume uses each chapter to recount one such transformation describing how a particular community of users and producers remade the computer into something new Haigh and Ceruzzi ground their accounts of these computing revolutions in the longer and deeper history of computing technology They begin with the story of the 1945 ENIAC computer which introduced the vocabulary of programs and programming and proceed through email pocket calculators personal computers the World Wide Web videogames smart phones and our current world of computers everywhere in phones cars appliances watches and more Finally they consider the Tesla Model S as an object that simultaneously embodies many strands of computing

Social, Casual and Mobile Games Michele Willson, Tama Leaver, 2017-08-24 The first collection dedicated to analysing the casual social and mobile gaming movements that are changing games the world over **Young Children and Families in the Information Age** Kelly L. Heider, Mary Renck Jalongo, 2014-12-05 This edited book presents the most recent theory research and practice on information and technology literacy as it relates to the education of young children Because computers have made it so easy to disseminate information the amount of available information has grown at an exponential rate making it impossible for educators to prepare students for the future without teaching them how to be effective information managers and technology users Although much has been written about information literacy and technology literacy in secondary education there is very little published research about these literacies in early childhood education Recently the National Association for the Education of Young Children and the Fred Rogers Center for Early Learning and Children's Media at Saint Vincent College published a position statement on using technology and interactive media as tools in early childhood programs This statement recommends more research to better understand how young children use and learn with technology and interactive media and also to better understand any short and long term effects Many assume that today's young children are digital natives with a great understanding of technology However children may know how to operate digital technology but be unaware of its dangers or its value to extend their abilities This book argues that information and technology literacy include more than just familiarity with the digital environment They include using technology safely and ethically to demonstrate creativity and innovation to communicate and collaborate to conduct research and use information and to think critically solve problems and make decisions **Start-Up Creation** F. Pacheco-Torgal, Erik Stavnsager Rasmussen, Claes G. Granqvist, Volodymyr Ivanov, Arturas Kaklauskas, Stephen Makonin, 2016-05-14 Start Up

Creation The Smart Eco efficient Built Environment provides a state of the art review on high technology applications and explains how these can be applied to improve the eco efficiency of the built environment Divided into four main parts the book explains the key factors behind successful startup companies that grow from university research including the development of a business plan the importance of intellectual property necessary entrepreneurial skills and innovative thinking Part Two presents the latest research findings on nano and bio based technologies and their application and use to the energy efficiency of the built environment Part Three focuses on the use of genetic algorithms Big Data and the Internet of Things applications Finally the book ends with an entire section dedicated to App development using selected case studies that illustrate their application and use for monitoring building energy efficiency Presents a definitive guide for startups that arise from college and university research and how the application of advanced technologies can be applied to the built environment Includes case studies on new advanced technologies and apps development Links startup creation to the eco efficient built environment through software applications
