Applied Linguistics And Primary School Teaching:

Applied Linguistics and Primary School Teaching Sue Ellis, Elspeth McCartney, 2011-04-07 Modern primary teachers must adapt literacy programmes and ensure efficient learning for all. They must also support children with language and literacy difficulties, children learning English as an additional language and possibly teach a modern foreign language. To do this effectively they need to understand the applied linguistics research that underpins so many different areas of the language and literacy curriculum. This book illustrates the impact of applied linguistics on curriculum frameworks and pedagogy. It captures the range of applied linguistics knowledge that teachers need and illustrates how this is framed and is used by policy makers, researchers, teacher educators and the other professions who work with teachers in schools. It considers how to effect professional development that works. It is essential reading for primary teachers but also for speech and language therapists, educational psychologists, learning support teachers and all those doing language or literacy research in the primary classroom.

Learning Foreign Languages in Primary School María del Pilar García Mayo, 2017-06-16 This book presents research on the learning of foreign languages by children aged 6-12 years old in primary school settings. The collection provides a significant and important contribution to this often overlooked domain and aims to provide research-based evidence that might help to inform and develop pedagogical practice. Topics covered in the chapters include the influence of learner characteristics on word retrieval, explicit second language learning and language awareness, meaning construction, narrative oral development, conversational interaction and how it relates to individual variables, first language use, feedback on written production, intercultural awareness raising and feedback on diagnostic assessment. It will be of interest to undergraduate and graduate students, researchers, teachers and stakeholders who are interested in research on how children learn a second language at primary school.

Applied Linguistics and Primary School Teaching Patricia Driscoll, 2015

Teaching and Learning English in the Primary School Gila A. Schauer, 2019-10-11 This book is the first comprehensive investigation of interlanguage pragmatic issues in a primary school context that is based on both primary school teachers' statements on their own teaching realities, views and preferences and a thorough investigation of materials used by teachers and recommended by teacher educators in the state the primary schools are located in. It offers a contrastive analysis of primary school learners acquiring English in a typical English as a foreign language school context and their age peers in the same state that are exposed to English in a school immersion context. This book will be of interest to scholars, researchers, educators in higher education that focus on English language teaching, second language acquisition and applied linguistics. It is also intended for students who are planning to become primary school teachers of English as a foreign language.

Language Planning in Primary Schools in Asia Richard Baldauf, Robert Kaplan, Knonko Kamwangamalu, Pauline Bryant, 2013-09-13 In foreign language education decisions must be taken on what languages to teach, who will teach them, in which schools, i.e. all, only urban, only rural, in which grades, the number of hours, a

week and the cost involved This book explores the answers to these questions across a number of Asian polities It illustrates why some of the efforts undertaken are successful and why some are not why despite significant investments of time and resources some students do not seem to acquire the languages being taught and why some teachers responsible for instruction in the designated foreign languages have problems achieving fluency in the designated language or have other language teaching difficulties It suggests some strategies various polities might attempt to achieve their stated language learning objectives This book was originally published as a special issue of Current Issues in Language Planning Applied Linguistics and the Teaching of English Hugh Fraser, William Robert O'Donnell, 1973 Applied Linguistics and Language Teacher Education Nat Bartels, 2005 Applied Linguistics and Language Teacher Education is aimed at applied linguists who are interested in understanding more about the learning of novice teachers in their classes The 21 studies in this volume provide information on the complexity of novice teachers learning and use of knowledge in a variety of applied linguistics classes such as SLA Syntax Pragmatics Sociolinguistics Phonetics and Phonology L2 Reading and Writing Testing and Content Based Instruction These studies were conducted in a variety of contexts from North and South America to Europe Asia and Australia and look at the preparation of teachers of English Spanish and Chinese The book also includes a state of the art summary of research on knowledge acquisition and use which provides applied linguists with a solid basis for developing their ideas about their students learning and use of the knowledge presented in their classes Furthermore valuable information for applied linguists interested in researching the learning in their own classrooms is provided by a chapter evaluating a variety of research methods Each author also provides insider information on the advantages and disadvantages of the research tools they used for investigating questions they have Linguistics at School Kristin Denham, Anne Lobeck, 2010-01-07 This volume shows how linguistics can be integrated into school curricula presenting research and practice in the field of language within education *Voices and Practices in Applied Linguistics* Clare Wright, Lou Harvey, James Simpson, 2019-11-04 *Voices and Practices in Applied Linguistics* comprises a selection of original applied linguistics based research on the theme of the diversity of Applied Linguistics and in Applied Linguistics It is a unique collection of reflections and cutting edge research relating to academic policy and professional fields of Applied Linguistics featuring chapters written by founders of the field established researchers and rising stars This accessible eclectic and forward looking volume is significant both for research and practice It highlights current globalised perspectives on diversity in language use and communication across a variety of contexts and with a rich mix of frameworks methodologies and participants Compiled and edited by a team of academic experts in the field this edited collection will be of interest to established and emerging researchers in Applied Linguistics globally It will also be relevant to language professionals practitioners and policy makers The volume draws together papers from the 2017 British Association for Applied Linguistics BAAL conference marking the 50th anniversary of its inaugural meeting Founded in the mid 1960s this UK based
