Pediatric Hepatology and Liver Transplantation Lorenzo D'Antiga, 2019-04-29 This book is the first to provide balanced examination of both pediatric liver disease and liver transplantation two topics that are inherently related given that most chronic liver disorders eventually require organ replacement The different forms of liver disease encountered in the pediatric age group are first discussed in a series of disease specific chapters that have a reader friendly uniform structure covering pathophysiology diagnostic and treatment algorithms clinical cases and transition to adult care Key topics in the field of liver transplantation are then addressed Examples include indications and contraindications surgical techniques and complications immunosuppression in pediatric liver transplantation acute and chronic rejection and allograft dysfunction and CMV and EBV infection in transplant recipients long term graft injury and tolerance A section on pediatric hepatology across the world

includes chapters presenting the features and management of pediatric liver disease in South America Africa and Asia A closing section considers what the future holds for pediatric liver disease and its management including novel genetic testing cell therapy and gene therapy Pediatric Hepatology and Liver Transplantation will be of value for a range of practitioners from residents making their first approach to pediatric liver disease through to specialists working in transplantation centers

Understanding Extreme Sports: A Psychological Perspective Eric Brymer, Francesco Feletti, Erik Monasterio, Robert D. Schweitzer, 2020-03-30 Extreme sports those activities that lie on the outermost edges of independent adventurous leisure activities where a mismanaged mistake or accident would most likely result in death have developed into a significant worldwide phenomenon Brymer Patterson 2002 and Generation Z turn to extreme sports because they are popular and linked to escapism Giannoulakis Pursglove 2017 Arguably extreme sports now support a multi billion dollar industry and the momentum seems to be intensifying Traditional explanations for why extreme sports have become so popular are varied For some the popularity is explained as the desire to rebel against a society that is becoming too risk averse for others it is about the spectacle and the merchandise that is associated with organised activities and athletes For others it is just that there are a lot of people attracted by risk and danger or just want to show off For others still it is about the desire to belong to sub cultures and the glamour that goes with extreme sports Some seek mastery in their chosen activity and in situations of significant challenges This confusion is unfortunate as despite their popularity there is still a negative perception about extreme sports participation There is a pressing need for clarity The dominant research perspective has focused on positivist theory driven perspectives that attempt to match extreme sports against predetermined characteristics For the most part empirical research has conformed to predetermined societal perspectives Other ways of knowing might reveal more nuanced perspectives of the human dimension of extreme sport participation This special edition brings together cutting edge research and thought examining psychology and extreme sports with particular attention payed to the examination of motivations for initial participation continued participation effective performance and outcomes from participation
