The Library of Franeker University in Context, 1585-1843 Jacob van Sluis, 2020-06-08 From 1585 to 1843 the Dutch town Franeker housed the University of Franeker It had its peak in the seventeenth century and attracted students from Protestant countries throughout Europe A library was founded right from the start and its collection has been preserved almost entirely Eleven catalogues were printed in the course of its existence and as a result the development of the collection can be examined chronologically The Library of Franeker University in Context 1585 1843 discusses the relationship with education at Franeker University in detail and makes a comparison with other similar libraries 'News from the Republic of Letters': *Scottish Students, Charles Mackie and the United Provinces, 1650-1750* Esther Mijers, 2012-05-03 The late seventeenth century Netherlands have traditionally been viewed as the intellectual entrepot of Europe in general and for Scotland in particular Scottish students flocked in large numbers to the Dutch universities bringing back ideas and books which influenced Scottish learning well into the eighteenth century This book is the first full length study of Scots in the United Provinces between 1650 and 1750 It analyses their numbers at the Dutch universities the education they received and the impact this had on Scottish learning on the eve of the Enlightenment showing that the Scottish Dutch relationship provided the infrastructure which allowed Scotland to take part in a wider Republic of Letters and that its culture was increasingly characterised by it English Students at Leiden University, 1575-1650 Daniela Prögler, 2016-05-13 The oldest and most renowned Dutch university Leiden was an attractive proposition for travelling foreign students in the seventeenth and eighteenth centuries Alongside offering an excellent academic program and outstanding facilities Leiden was also able to cater to the desires of noble students providing various extra curricular activities Leiden was the most popular continental university among English students and this book investigates the 831 English students who studied there between 1575 and 1650 The preference of English students for Leiden was on the one hand related to close Anglo Dutch relations of the period and these are investigated with respect to politics economy religion culture as well as to the large stranger communities residing in the respective countries On the other hand Leiden s attraction resulted from its academic achievements which are traced back to the conditions in the United Provinces the limited influence of the Calvinist Church Leiden s professors as well

as the university's facilities The core of this study is an exhaustive quantitative study of the composition of the Leiden student population in general and that of its English segment in particular Information is provided on the duration of the studies of English students at Leiden their age social background and fields of study We learn about the careers of English students both prior to and after their time at Leiden and of the motivation that led the English to choose Leiden over other continental universities More than a study of one group of students at one university this book is a valuable contribution to the history of early modern universities and will appeal to a wide international readership interested in cultural and intellectual history as well as in Anglo Dutch relations

Written in Blood Petrus Cornelis Spierenburg, 2004 Spierenburg narrates two sensational murdercases among intimates in eighteenth century Amsterdam The cases both resulted from fatal attraction The eighteenth century witnessed great cultural changes affecting personal relationships The new ideal of love demanded that couples spent more time together and explore each other's feelings For married couples that might be good for other couples it might be disaster

A Classified Bibliography of the History of Dutch Medicine 1900-1974 G.A. Lindeboom, 2012-12-06 I In some periods of the past Netherlands medicine has played a major role in the evolution of European medicine today its history still enjoys much interest even at the other side of the Ocean In this bibliography it has been my endeavour to compile references for all that has been written on the history of Dutch medicine in our country and elsewhere in our age The main concern of this work is with the medicine of the Northern Netherlands However before the end of the sixteenth century the Northern and Southern Netherlands were not yet divided into two separate countries they were still politically one and for the greater part spoke the same Flemish language So before their separation the present day Belgium and Netherlands also had a common medical history Therefore many entries have been included which bear on early and sometimes later Flemish medicine but it has not been the intention to strive for completeness in this respect
