Ingenious in construction and sequencing, this book will influence science teacher educators by introducing them to issues of equity and social justice directly related to women and people of color. The authors unflinchingly interrogate issues of equity which need to be addressed in science education courses. It begins with setting current cultural and equity issues within a historic frame. The first chapter sets the scene by moving the reader through 400 years in which African Americans were scientifically excluded from science. This is followed by a careful review of the Jim Crow era, an analysis of equity issues of women, and ends with an examination of sociocultural consciousness and culturally responsive teaching. Two chapters comprise the second section. Each chapter examines the role of the science teacher in providing a safe place by promoting equity and social justice in the classroom. The three chapters in the third section focus on secondary science teachers. Each addresses issues of preparation that provides new teachers with understanding of equity and provokes questions of good teaching. Section four enhances and expands the first section as the authors suggest cultural barriers, the impact of STEM engagement by marginalized groups. The last section, composed of three chapters, interrogates policy issues that influence the science classroom. Molly Weinburgh, Texas Christian University, Fort Worth, USA.
