Baluchistan Review December 2015 November Summary:

Balochistan and the Mélange of Violence Seema Khan, 2023-11-10 This book presents a comprehensive analysis of the intricate security situation prevailing in Balochistan. It explores and establishes correlations between the internal structural vulnerabilities and fault lines of the Pakistani state with the external influences exerted on the region. Employing a rigorous examination of both primary and secondary data, the volume critically examines the multifaceted nature of organised violence in Balochistan. In addition to separatist movements, the presence of religious militancy and cross border terrorism is thoroughly examined. The book delves into the external involvement of regional and global powers in the intricate tapestry of violence within Balochistan, thereby shedding light on the emerging geopolitical landscape and the corresponding power dynamics in the region. It also analyses how the implementation of largescale developmental initiatives, particularly facilitated by China under the auspices of the China Pakistan Economic Corridor (CPEC), has elevated the geostrategic significance of Balochistan while simultaneously entangling it in the vortex of regional power politics. This volume will be of interest to scholars and researchers specializing in geopolitics, International Relations and South Asian studies. Minerals Yearbook Mines Bureau, Geological Survey, Interior Department, 2018-04-19 Minerals Yearbook 2014 V 3 Area Reports International Asia and the Pacific Volume III Area Reports International is published as four separate reports. Each report begins with an overview of the region's mineral industries during the year. It continues with individual country chapters that examine the mining, refining, processing and use of minerals in each country of the region and how each country's mineral industry relates to U.S. industry. Most chapters include production tables and industry structure tables, information about Government policies and programs that affect the country's mineral industry and an outlook section.
