Barbarian Migrations And The Roman West 376 568 Cambridge Medieval Textbooks:

Barbarian Migrations and the Roman West, 376-568 Guy Halsall, 2007-12-20 This is a major survey of the barbarian migrations and their role in the fall of the Roman Empire and the creation of early medieval Europe one of the key events in European history Unlike previous studies it integrates historical and archaeological evidence and discusses Britain Ireland mainland Europe and North Africa demonstrating that the Roman Empire and its neighbours were inextricably linked A narrative account of the turbulent fifth and early sixth centuries is followed by a description of society and politics during the migration period and an analysis of the mechanisms of settlement and the changes of identity Guy Halsall reveals that the creation and maintenance of kingdoms and empires was impossible without the active involvement of people in the communities of Europe and North Africa He concludes that contrary to most opinions the fall of the Roman Empire produced the barbarian migrations not vice versa Barbarian Migrations and the Roman West, 376-568 Guy Halsall, 2007

Arianism: Roman Heresy and Barbarian Creed Guido M. Berndt, 2016-04-15 This is the first volume to attempt a comprehensive overview of the evolution of the Arian churches in the Roman world of Late Antiquity and their political importance in the late Roman kingdoms of the 5th 6th centuries ruled by barbarian warrior elites Bringing together researchers from the disciplines of theology history and archaeology and providing an extensive bibliography it constitutes a breakthrough in a field largely neglected in historical studies A polemical term coined by the Orthodox Church the side that prevailed in the Trinitarian disputes of the 4th century C E for its opponents in theology as well as in ecclesiastical politics Arianism has often been seen as too complicated to understand outside the group of theological specialists dealing with it and has therefore sometimes been ignored in historical studies The studies here offer an introduction to the subject grounded in the historical context then examine the adoption of Arian Christianity among the Gothic contingents of the Roman army and its subsequent diffusion in the barbarian kingdoms of the late Roman world **Early Medieval Europe**

is an essential guide for any student wishing to gain a deeper level of understanding and greater confidence in creative and independent historical thought *Norms of Dependency in Late Antique and Early Medieval Societies* Martin

Schermaier, Julia Winnebeck, Matthias Becher, 2025-06-02 Late antique and early medieval normative sources frequently employ Roman legal terminology to denote a person's legal inferiority and thus suggest the continued relevance of the concepts associated with these terms. However, it is far from clear to what extent the use of identical terminology actually indicates the similarity of social phenomena. There is ample evidence of important changes regarding the rights and duties of enslaved persons and the development or emergence of other new forms of asymmetrical dependency. This raises the question to what extent consistency in terminology and legal practice is actually an indicator of the stability of social structures. Against this background, a group of scholars of legal, ecclesiastical and social history were invited to a conference at the BCDSS in March 2022 to scrutinise different law codes and legal sources for their evidence of dependency. The result are these ten papers that truly enhance our understanding of slavery and other dependency relations in late antique and early medieval societies from c. 100 to c. 900 CE *Roman Infrastructure in Early Medieval Britain* Mateusz

Fafinski, 2025-10-01 Early Medieval Britain was more Roman than we think. The Roman Empire left vast infrastructural resources on the island. These resources lay buried not only in dirt and soil but also in texts, laws, chronicles, charters, even churches and landscapes. This book uncovers them and shows how they shaped Early Medieval Britain. Infrastructures material and symbolic can work in ways that are not immediately obvious and exert an influence long after their creators have gone. Infrastructure can also rest dormant and be reactivated with a changed function, role and appearance. This is not a simple story of continuity and discontinuity. It is a story of adaptation and transformation of how the Roman infrastructural past was used and re-used and also how it influenced the later societies of Britain **Catalaunian Fields AD 451** Simon

MacDowall, 2015-09-20 The battle of the Catalaunian Fields saw two massive powerful empires square up in a conflict that was to shape the course of Eurasian history forever. For despite the Roman victory the Roman Empire would not survive for more than 15 years following the battle whilst the Huns shattered and demoralized would meet their downfall against a coalition of German tribes soon after. This book using revealing bird's eye views of the plains of Champagne and detailed illustrations of the opposing warriors in the midst of desperate combat describes the fighting at the Catalaunian Fields and reveals the broader campaign of Hunnic incursion that led up to it. Drawing on the latest research Simon MacDowall reveals the shocking intensity and appalling casualties of the battle whilst assessing the wider significance and consequences of the campaign *Medievalia et Humanistica, No. 35* Paul Maurice Clogan, 2009-12-15 Since its founding in 1943 *Medievalia et Humanistica* has won worldwide recognition as the first scholarly publication in America to devote itself entirely to medieval and Renaissance studies. Since 1970 a new series sponsored by the Modern Language Association of America and edited by an international board of distinguished scholars and critics has published interdisciplinary articles. In yearly hardcover

volumes the new series publishes significant scholarship criticism and reviews treating all facets of medieval and Renaissance culture history art literature music science law economics and philosophy Medievalia et Humanistica Editorial Board and Submissions Guidelines

The Battles of King Arthur Tony Sullivan, 2022-07-20 The ninth century Historia Brittonum is the first source that mentions Arthur and lists twelve battles including the famous Badon Hill Much ink has been spilt debating the identity and location of Arthur This book will demonstrate that some of the battles can indeed be located with some confidence Rather than fit a specific theory as to his identity the battles are placed in the fragmenting provincial political and military context of the late fifth and early sixth century Britain At a time of rapid changes in cultural identity and a significant increase in Germanic material culture and migration These battles might be expected to be found along borders and in zones of potential conflict Yet this is not what is discovered In addition the simplistic idea of Romano Britons holding back invading Anglo Saxons is found wanting Instead we discover a far more nuanced political and cultural situation One with increasing evidence of continuation of land use and the indigenous population The most Romanised and urbanised regions of the south and east are the very areas that experienced the arrival of Germanic settlement The conclusion gives the reader a new insight into what sort of man Arthur was and the nature of the battles he fought To the Madbar and Back Again
