Foundations of Optimization Osman Güler,2010-08-03 This book covers the fundamental principles of optimization in finite dimensions It develops the necessary material in multivariable calculus both with coordinates and coordinate free so recent developments such as semidefinite programming can be dealt with

Classical And Modern Optimization Guillaume Carlier,2022-03-16 The quest for the optimal is ubiquitous in nature and human behavior The field of mathematical optimization has a long history and remains active today particularly in the development of machine learning Classical and Modern Optimization presents a self contained overview of classical and modern ideas and methods in approaching optimization problems The approach is rich and flexible enough to address smooth and non smooth convex and non convex finite or infinite dimensional static or dynamic situations The first chapters of the book are devoted to the classical toolbox topology and functional analysis differential calculus convex analysis and necessary conditions for differentiable constrained optimization The remaining chapters are dedicated to more specialized topics and applications Valuable to a wide audience including students in mathematics engineers data scientists

or economists Classical and Modern Optimization contains more than 200 exercises to assist with self study or for anyone teaching a third or fourth year optimization class

Reinforcement Learning for Optimal Feedback Control Rushikesh Kamalapurkar, Patrick Walters, Joel Rosenfeld, Warren Dixon, 2018-05-10 Reinforcement Learning for Optimal Feedback Control develops model based and data driven reinforcement learning methods for solving optimal control problems in nonlinear deterministic dynamical systems In order to achieve learning under uncertainty data driven methods for identifying system models in real time are also developed The book illustrates the advantages gained from the use of a model and the use of previous experience in the form of recorded data through simulations and experiments The book s focus on deterministic systems allows for an in depth Lyapunov based analysis of the performance of the methods described during the learning phase and during execution To yield an approximate optimal controller the authors focus on theories and methods that fall under the umbrella of actor critic methods for machine learning They concentrate on establishing stability during the learning phase and the execution phase and adaptive model based and data driven reinforcement learning to assist readers in the learning process which typically relies on instantaneous input output measurements This monograph provides academic researchers with backgrounds in diverse disciplines from aerospace engineering to computer science who are interested in optimal reinforcement learning functional analysis and functional approximation theory with a good introduction to the use of model based methods The thorough treatment of an advanced treatment to control will also interest practitioners working in the chemical process and power supply industry

Optimal Control: Novel Directions and Applications Daniela Tonon, Maria Soledad Aronna, Dante Kalise, 2017-09-01 Focusing on applications to science and engineering this book presents the results of the ITN FP7 SADCO network s innovative research in optimization and control in the following interconnected topics optimality conditions in optimal control dynamic programming approaches to optimal feedback synthesis and reachability analysis and computational developments in model predictive control The novelty of the book resides in the fact that it has been developed by early career researchers providing a good balance between clarity and scientific rigor Each chapter features an introduction addressed to PhD students and some original contributions aimed at specialist researchers Requiring only a graduate mathematical background the book is self contained It will be of particular interest to graduate and advanced undergraduate students industrial practitioners and to senior scientists wishing to update their knowledge

A Basic Guide to Uniqueness Problems for Evolutionary Differential Equations Mi-Ho Giga, Yoshikazu Giga, 2023-09-14 This book addresses the issue of uniqueness of a solution to a problem a very important topic in science and technology particularly in the field of partial differential equations where uniqueness guarantees that certain partial differential equations are sufficient to model a given phenomenon This book is intended to be a short introduction to uniqueness questions for initial value problems One often weakens the notion of a solution to include non differentiable solutions Such a solution is called a weak solution It is easier to find a weak solution but it is more difficult to establish its

uniqueness This book examines three very fundamental equations ordinary differential equations scalar conservation laws and Hamilton Jacobi equations Starting from the standard Gronwall inequality this book discusses less regular ordinary differential equations It includes an introduction of advanced topics like the theory of maximal monotone operators as well as what is called DiPerna Lions theory which is still an active research area For conservation laws the uniqueness of entropy solution a special discontinuous weak solution is explained For Hamilton Jacobi equations several uniqueness results are established for a viscosity solution a kind of a non differentiable weak solution The uniqueness of discontinuous viscosity solution is also discussed A detailed proof is given for each uniqueness statement The reader is expected to learn various fundamental ideas and techniques in mathematical analysis for partial differential equations by establishing uniqueness No prerequisite other than simple calculus and linear algebra is necessary For the reader's convenience a list of basic terminology is given at the end of this book

Fast Solution of Discretized Optimization Problems Karl-Heinz

Hoffmann, Ronald W. Hoppe, Volker Schulz, 2012-12-06 Differential equations partial as well as ordinary are one of the main tools for the modeling of real world application problems Pursuing the ultimate aim of influencing these systems in a desired way one is confronted with the task of optimizing discretized models This volume contains selected papers presented at the International Workshop on Fast Solution of Discretized Optimization Problems which took place at the Weierstrass Institute for Applied Analysis and Stochastics in Berlin from May 08 until May 12 2000 The conference was attended by 59 scientists from 10 countries The scientific program consisted of 8 invited lectures presented by H G Bock IWR Heidelberg M Heinkenschloss Rice University Houston K Kunisch University of Graz U Langer University Linz B Mohammadi University of Montpellier J Petersson University of Linköping E Sachs University of Trier F Troltzsch Technical University of Chemnitz and 28 contributed talks The aim of this workshop was to foster the exchange of ideas between the still comparatively separated disciplines of nonlinear optimization on the one side and numerical methods for differential equations on the other side This is necessary for the successful solution of various current optimization problems in practical applications shape optimization topology optimization process optimization Therefore the organizing committee as well as the speakers have come from both these communities

Advanced Concepts for Intelligent Vision Systems Jaques Blanc-Talon, Andrzej Kasiniski, Wilfried Philips, Dan Popescu, Paul Scheunders, 2013-10-23 This book constitutes the thoroughly refereed proceedings of the 15th International Conference on Advanced Concepts for Intelligent Vision Systems ACIVS 2013 held in Pozna Poland in October 2013 The 63 revised full papers were carefully selected from 111 submissions The topics covered are acquisition pre processing and coding biometry classification and recognition depth 3D and tracking efficient implementation and frameworks low level image analysis segmentation and video analysis
