

**DESCRIPTION**

The ALTEC 755E loudspeaker features a rare combination of plus factors...true high-fidelity reproduction, small size, and slim profile.

In any low-level distribution system for wired music, program distribution, paging systems or public address, the 755E will provide superior performance. Its unique configuration provides very smooth distribution over a wide 90° angle without high-frequency loss. This wide

distribution pattern allows greater separation between loudspeakers in ceiling installations, thus reducing the number of speakers required as well as amplifier power requirements.

With its small size, wide distribution angle and outstanding frequency range, the 755E provides greater installation convenience and higher audio quality than any other speaker of comparable size.

is a daunting one since only a multivolume encyclopedia could truly do justice to the subject. Authors writing about this subject have generally concentrated on their own areas of expertise, often covering their own specific topics in great detail. This book is no exception; the author's background is largely in professional loudspeaker application and specification, and the emphasis in this book is on basic component design, operation, measurement, and system concepts. The book falls largely into two sections: the first, Chapters 1-9, emphasizing the building blocks of the art, and the second, Chapters 10-16, emphasizing applications, measurements, and modeling. While a thorough understanding of the book requires a basic knowledge of complex algebra, much of it is understandable through referring to the graphics. Every attempt has been made to keep graphics clear and intuitive. Chapter 1 deals with the basic electro-mechano-acoustical chain between input to the loudspeaker and its useful output, with emphasis on the governing equations and equivalent circuits. Chapter 2 is a survey of cone and dome drivers, the stock in trade of the industry. They are discussed in terms of type, design, performance, and performance limits. Chapter 3 deals with magnetics. Once a source of difficulty in loudspeaker design, magnetics today yields easily to modeling techniques. Chapter 4 discusses low-frequency (LF) system performance primarily from the viewpoint of Thiele/Small parameters. We also discuss some of the multi-chamber LF systems that became popular during the eighties.

The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him.
