Programming Guide

Your Alarm and/or Remote Start unit has a configurable receiver that allows the transmitter to be programmed to operate the Lock/Unlock functions with one transmitter button or with two transmitter buttons (separate Lock/Unlock). In addition, the receiver also allows driver priority function. This driver priority function takes place when ever a particular transmitter is used to unlock the vehicle regardless of the selection of one button or two button operation.

The following indicates the receiver programmable slots.

- 1 Lock/Unlock or Lock
- 2 Unlock if Programmed
- 3 Trunk Release & or Remote Start (Optional on some models)
- 4 Auxiliary Output
- 5 Auxiliary Output
- 6 Driver 1 Priority or Separate Output
- 7 Driver 2 Priority or Separate Output

Receiver channels 6 or 7 will accept the programming of transmitter channel 1 if used as the Lock/Unlock button, or Channel 2 when separate Lock/Unlock buttons are programmed. In this way, whenever the transmitter is used to unlock the vehicle, channel 6 or 7, when programmed, will provide a pulsed ground output. This output can be connected to the driver priority function of the vehicle to reset preset user features. Please consult with your installation centers technician to see if this feature is available in your vehicle.

NOTE: A total of 4 transmitters may be programmed into any receiver channel.

Force programming a transmitter, removing a transmitter, or reprioritizing a transmitter is covered later in this manual.

Also, if you do not program a transmitter button into channel 2 which is the separate unlock/disarm channel, then whatever button is programmed into channel 1 will serve as both lock/arm & unlock/disarm.

Note: The RED Button serves as a function button in combination with other buttons explained in your owners manual. This button may not be used to operate a receiver channel.

NOTE: The Option Button is predetermined and programmed for access to Time Start, and Temperature Start & Check so it cannot be used for multiple button operation of any other feature. It will however operate for any single button programming.

This transmitter is also capable of one button programming for certain model Audiovox Alarms. If your alarm is one of these models, then when step 3 is completed on the following page, you can turn the ignition switch off and
