Algorithms And Architectures Of Artificial Intelligence Frontiers In Artificial Intelligence And Applications:

Algorithms and Architectures of Artificial Intelligence Enn Tyugu, 2007-08-15 This book gives an overview of methods developed in artificial intelligence for search learning problem solving and decision making It gives an overview of algorithms and architectures of artificial intelligence that have reached the degree of maturity when a method can be presented as an algorithm or when a well defined architecture is known e g in neural nets and intelligent agents It can be used as a handbook for a wide audience of application developers who are interested in using artificial intelligence methods in their software products Parts of the text are rather independent so that one can look into the index and go directly to a description of a method presented in the form of an abstract algorithm or an architectural solution The book can be used also as a textbook for a course in applied artificial intelligence Exercises on the subject are added at the end of each chapter Neither programming skills nor specific knowledge in computer science are expected from the reader However some parts of the text will be fully understood by those who know the terminology of computing well , **Information Modelling**

and Knowledge Bases XIX H. Jaakkola, Y. Kiyoki, T. Tokuda, 2008-01-10 In the last decades information modelling and knowledge bases have become hot topics not only in academic communities related to information systems and computer science but also in business areas where information technology is applied This book includes papers submitted to the 17th European Japanese Conference on Information Modelling and Knowledge Bases EJC 2007 The EJC conferences constitute a world wide research forum for the exchange of scientific results and experiences achieved in computer science and other related disciplines using innovative methods and progressive approaches In this way a platform has been established drawing together researches as well as practitioners dealing with information modelling and knowledge bases Thus the main topics of the EJC conferences target the variety of themes in the domain of information modelling conceptual analysis design and specification of information systems ontologies software engineering knowledge and process management data and knowledge bases The organizers also aim at applying new progressive theories To this end much attention is being paid also to theoretical disciplines including cognitive science artificial intelligence logic linguistics and analytical philosophy The selected papers cover many areas of information modelling namely theory of concepts database semantics knowledge representation software engineering WWW information management context based information retrieval ontological technology image databases temporal and spatial databases document data management process management and many others *Artificial Intelligence in Education* Ulrich Hoppe, Maria Feliza Verdejo, Judy Kay, 2003 This work reports on
