**Balance: Essential or Ephemeral?** Andreas Schwingshackl,Stephania A. Cormier,Kanwaljeet J. S. Anand,2017-09-28 Burn out and suicide rates among physicians and scientists in academic medicine are at an all time high and jeopardize the future of our entire profession In the last 4 years alone burn out rates among physicians have increased by 25% In a recent 2017 Medscape publication burn out rates in Critical Care physicians ranked in 9th place and Pediatricians ranked 13th among 27 subspecialties Astonishingly over 50% of the participants reported burn out symptoms with clear race and gender disparities While men generally report higher burn out rates than women it is important to emphasize that response rates from women in these surveys were notoriously low and may not represent the complete picture These numbers are even more dismal for tenured academic faculty at research extensive universities In this group emotional exhaustion i e high burn out is reported at 35% with a clear association with age and lower burn out levels in the older tenured faculty While no gender or racial ethnic differences were found in this particular group higher levels of burn out were identified in individuals with financial responsibilities beyond a spouse and child While it is comforting to note the increasing public interest and research activities in this field successful approaches to ameliorate the burden and consequences of physician burn out are still inadequately developed Academic centers increasingly offer some type of work life balance program to their employees but unfortunately these programs are frequently adopted from corporate business models and remain largely ineffective in the academic environment It should be evident to most administrators that the stressors of academic clinicians and scientists substantially differ from those of corporate employees Based on these observations and over 75 years of combined experience in academic medicine amongst the three editors of this Research Topic we collected 26 manuscripts from 22 authors at different career stages and different genders ethnicities marital status and subspecialties to identify and stratify common and specific stressors and therapeutic approaches to ameliorate burn out and achieve work life balance in academic medicine We are confident that each reader will identify with at least one if not several of the authors opinions experiences and approaches to attain greater work life balance and thereby avoid the consequences of burn out in modern academic medicine **Keep**

**Calm and Call the Dean of Students** Art Munin,Lori S. White,2023-07-03 The role of Dean of Students is pivotal in students lives for their institutions as a conduit to senior administration about issues of concern to students as a figure who

can coordinate disparate campus constituencies from academic affairs and athletics to campus safety and relationships with parents and alums and as a crisis manager What preparation skills dispositions and knowledge do DOSs need to be effective in their role and indeed what areas and range of activities generally fall under their responsibility Through chapters by experienced DOSs from early career to veterans and in between this book provides vivid first hand accounts of what s involved in managing the multiple roles of the deanship its immense personal rewards the positive impact that practitioners can make in the lives of students and on campus policy and environment without glossing over the demands on time and the concomitant stresses The contributors describe the paths they followed to take on the role and what they do to keep current Each chapter offers a wealth of anecdotes that provide an insider s feel for the daily life of the DOS and how incumbents have found ways to integrate family and personal needs with the discharging of their often demanding responsibilities The contributing authors offer valuable advice on setting priorities and dealing with issues as varied as setting budgets creating an effective team delegation and addressing student conduct issues They offer guidance on developing allies across campus keeping up to date with trends and legislation and building a network of mentors and advisors through professional associations and connection with their peers at institutions around the country The book concludes with some perspectives about the meaning and purpose of the dean of students role in our current era and as we look to the future of higher education The dean of students is a challenging role because it is often the one administrator thrust onto the frontlines to meet students not only at their best but also at their worst This person is an advocate and educator disciplinarian and friend confidant and counselor and advisor and parent all rolled into one Keep Calm and Call the Dean of Students offers a unique window into this challenging and rewarding position that will appeal to sitting deans to those seeking this role and to senior leaders in higher education seeking to appoint a DOS and or organize a dean of students portfolio of responsibilities
