Building Information Modeling Karen Kensek, Douglas Noble, 2014-05-02 The bright future and exciting possibilities of BIM Many architects and engineers regard BIM as a disruptive force changing the way building professionals design build and ultimately manage a built structure With its emphasis on continuing advances in BIM research teaching and practice Building Information Modeling BIM in Current and Future Practice encourages readers to transform disruption to opportunity and challenges them to reconsider their preconceptions about BIM Thought leaders from universities and professional practice composed essays exploring BIM s potential to improve the products and processes of architectural design including the structure and content of the tools themselves These authors provide insights for assessing the current practice and research directions of BIM and speculate about its future The twenty six chapters are thematically grouped in six sections that present complementary and sometimes incompatible positions Design Thinking and BIM BIM Analytics Comprehensive BIM Reasoning with BIM Professional BIM BIM Speculations Together these authors provide stimulating ideas regarding new directions in building information modeling Building Information Modeling Karen Kensek, Douglas Noble, 2014

Building Information Modeling For Dummies Stefan Mordue, Paul Swaddle, David Philp, 2015-12-21 Everything you need to make the most of building information modeling If you re looking to get involved in the world of BIM but don t quite know where to start Building Information Modeling For Dummies is your one stop guide to collaborative building using one coherent system of computer models rather than as separate sets of drawings Inside you ll find an easy to follow introduction to BIM and hands on guidance for understanding drivers for change the benefits of BIM requirements you need to get started and where BIM is headed The future of BIM is bright it provides the industry with an increased understanding of predictability improved efficiency integration and coordination less waste and better value and quality Additionally the use of BIM goes beyond the planning and design phase of the project extending throughout the building life cycle and supporting processes including cost management construction management project management and facility operation Now heavily adopted in the U S Hong Kong India Singapore France Canada and countless other countries BIM is set to become a mandatory practice in building work in the UK and this friendly guide gives you everything you need to make sense of it fast Demonstrates how BIM saves time and waste on site Shows you how the information generated from BIM leads to fewer errors on site Explains how BIM is based on data sets that describe objects virtually mimicking the way they ll be handled physically in the real world Helps you grasp how the integration of BIM allows every stage of the life cycle to work together without data or process conflict Written by a team of well known experts this friendly hands on guide gets you up and running with BIM fast *Building Information Modeling* Karen Kensek, 2014-04-16 This is a design guide for architects engineers and contractors concerning the principles and specific applications of building information modeling BIM BIM has the potential to revolutionize the building industry and yet not all architects and construction professionals fully

understand what the benefits of BIM are or even the fundamental concepts behind it As part of the PocketArchitecture Series it includes two parts fundamentals and applications which provide a comprehensive overview of all the necessary and essential issues It also includes case studies from a range of project sizes that illustrate the key concepts clearly and use a wide range of visual aids Building Information Modeling addresses the key role that BIM is playing in shaping the software tools and office processes in the architecture engineering and construction professions Primarily aimed at professionals it is also useful for faculty who wish to incorporate this information into their courses on digital design BIM and professional practice As a compact summary of key ideas it is ideal for anyone implementing BIM **A Building Information**

Modelling Maturity Model for Developing Countries Samuel Adekunle, Clinton Ohis Aigbavboa, Obuks

Ejohwomu, Wellington Didibhuku Thwala, Abdul-Majeed Mahamadu, 2023-07-07 This book provides a reference point for the development of Building Information Modelling BIM maturity in the developing country context Developing countries have been observed to have low BIM maturity and are struggling to adopt the technology amidst no clearly defined pathways for achieving BIM capability maturity The research presented in this book provides construction industry stakeholders in developing countries with a framework and nomological map to aid in the advancement of BIM implementation This work provides a pathway for overcoming the challenges inhibiting BIM maturity in developing countries and ultimately its diffusion in order to harness the benefits The authors provide critical theoretical insights on BIM maturity in the developing country context a comparative analysis of BIM maturity in both developing and developed countries and finally a conceptualisation of BIM maturity for developing countries The book is unique as its construct is rooted in the state of the art information management standards in the digitalisation era in the construction industry ISO 19650 The book delivers a theoretical reference point to the academic and research community and for the industry stakeholder an essential guide to achieving BIM maturity at macro and micro levels *Future Challenges in Evaluating and Managing Sustainable Development in the*

Built Environment Peter S. Brandon, Patrizia Lombardi, Geoffrey Q. Shen, 2024-09-23 *Future Challenges in Sustainable Development within the Built Environment* stimulates and reinterprets the demands of Responsible and Sustainable Development in the Built Environment for future action and development It examines the methods of evaluation the use of technology the creation of new models and the role of human factors for examining and developing the subject over the next twenty years *Building Performance Simulation for Design and Operation* Jan L.M. Hensen, Roberto Lamberts, 2019-04-24

When used appropriately building performance simulation has the potential to reduce the environmental impact of the built environment to improve indoor quality and productivity as well as to facilitate future innovation and technological progress in construction Since publication of the first edition of *Building Performance Simulation for Design and Operation* the discussion has shifted from a focus on software features to a new agenda which centres on the effectiveness of building performance simulation in building life cycle processes This new edition provides a unique and comprehensive overview of

building performance simulation for the complete building life cycle from conception to demolition and from a single building to district level It contains new chapters on building information modelling occupant behaviour modelling urban physics modelling urban building energy modelling and renewable energy systems modelling This new edition keeps the same chapter structure throughout including learning objectives chapter summaries and assignments Moreover the book Provides unique insights into the techniques of building performance modelling and simulation and their application to performance based design and operation of buildings and the systems which service them Provides readers with the essential concepts of computational support of performance based design and operation Provides examples of how to use building simulation techniques for practical design management and operation their limitations and future direction It is primarily intended for building and systems designers and operators and postgraduate architectural environmental or mechanical engineering students

Data-driven BIM for Energy Efficient Building Design Saeed Banihashemi,Hamed Golizadeh,Farzad Pour Rahimian,2022-12-16 This research book aims to conceptualise the scale and spectrum of Building Information Modelling BIM and Artificial Intelligence AI approaches in energy efficient building design and to develop its functional solutions with a focus on four crucial aspects of building envelop building layout occupant behaviour and heating ventilation and air conditioning HVAC systems Drawn from theoretical development on the sustainability informatics and optimisation paradigms in built environment the energy efficient building design will be marked through the power of data and BIM intelligent agents during the design phase It will be further developed via smart derivatives to reach a harmony in the systematic integration of energy efficient building design solutions a gap that is missed in the extant literature and that this book aims to fill This approach will inform a vision for future and provide a framework to shape and respond to our built environment and how it transforms the way we design and build By considering the balance of BIM AI and energy efficient outcomes the future development of buildings will be regenerated in a direction that is sustainable in the long run This book is essential reading for those in the AEC industry as well as computer scientists
