Arnold, 2016-09-09 This handbook explores the topic of death and dying from the late twentieth to the early twenty first centuries with particular emphasis on the United States In this period technology has radically changed medical practices and the way we die as structures of power have been reshaped by the rights claims of African Americans women gays students and most relevant here patients Respecting patients values has been recognized as the essential moral component of clinical decision making Technology's promise has been seen to have a dark side it prolongs the dying process For the first time in history human beings have the ability control the timing of death With this ability comes a responsibility that is awesome and inescapable How we understand and manage this responsibility is the theme of this volume The book comprises six sections Section I examines how the law has helped shape clinical practice emphasizing the roles of rights and patient autonomy Section II focuses on specific clinical issues including death and dying in children continuous sedation as a way to relieve suffering at the end of life and the problem of prognostication in patients who are thought to be dying Section III considers psychosocial and cultural issues Section IV discusses death and dying among various vulnerable populations such as the elderly and persons with disabilities Section V deals with physician assisted suicide and active euthanasia lethal injection Finally Section VI looks at hospice and palliative care as a way to address the psychosocial and ethical problems of death and dying

Nursing Ethics P. Anne Scott, Shane M. Scott, 2024-11-15 This second edition offers updates new topics and new short case studies based on real stories from the health care arena ensuring that each chapter of this book is rooted in descriptions of nursing practise that are grounded salient narratives of nursing care The reader is assisted to explore the ethical dimension of nursing practice what it is and how it can be portrayed discussed and analysed within a variety of practice and theoretical contexts One of the unique contributions of this book is to consider nursing not only in the context of the individual nurse patient relationship but also as a social good that is of necessity limited due to the ultimate limits on the nursing and health care resource This book will help the reader consider what good nursing looks like both within the context of limitations on resources during crises situations and under conditions of scarcity Indeed any discussion of ethical issues in nursing should be well grounded in a conceptualisation of nursing that nursing students and practising nursing can recognise accept and engage with Nursing like medicine social work and teaching has a clear moral aim to do good In the case of nursing to do good for the patient However it is vital that in the pressurised constrained post COVID 19 pandemic health service of the 21st century we help nurses explore what this might mean for nursing practice and what can reasonably be expected of the individual nurse and the nursing profession in terms of good nursing care

Clinical Ethics Handbook for Nurses Pamela Grace, Aimee Milliken, 2022-05-05 This handbook provides tools for nurse educators ethics educators practicing nurses and allied health professionals for developing confidence and skill in ethical decision making in interdisciplinary settings such as acute and chronic care hospitals and clinics It is useful for all healthcare personnel who face ethical issues in the course of their work and who work with nurses to resolve these issues While the content is based on a US context the concerns of nurses internationally are discussed and emphasized Nurses working in acute and chronic care settings face many obstacles to providing good care and are often the

first line of defense related to patient safety and meeting the needs of patients and their families Some of the obstacles to optimal patient care are institutional some sociocultural and others the result of inadequate communication Evidence points to the idea that while nurses do have the knowledge and skills to address practice problems of various sorts they may not be confident in their skills of ethical decision making and advocacy actions This is a resource to develop moral agency on behalf of individuals and to address broader barriers to good care raised at the local community or social levels Journal of Palliative Care ,2003
