Foster, 2018-03-12 *Viruses Molecular Biology Host Interactions and Applications to Biotechnology* provides an up to date introduction to human animal and plant viruses within the context of recent advances in high throughput sequencing that have demonstrated that viruses are vastly greater and more diverse than previously recognized It covers discoveries such as the Mimivirus and its virophage which have stimulated new discussions on the definition of viruses their place in the current view and their inherent and derived interactomics as defined by the molecules and the processes by which virus gene products interact with themselves and their host's cellular gene products Further the book includes perspectives on basic aspects of virology including the structure of viruses the organization of their genomes and basic strategies in replication and expression emphasizing the diversity and versatility of viruses how they cause disease and how their hosts react to such disease and exploring developments in the field of host microbe interactions in recent years The book is likely to appeal and be useful to a wide audience that includes students academics and researchers studying the molecular biology and applications of viruses Provides key insights into recent technological advances including high throughput sequencing Presents viruses not only as formidable foes but also as entities that can be beneficial to their hosts and humankind that are helping to shape the tree of life Features exposition on the diversity and versatility of viruses how they cause disease and an exploration of virus host interactions *Ghosts in the Dating App Machine* Gregory Narr, 2025-10-28 *Ghosts in the Dating App Machine* offers a critical examination of the shift to dating apps to illustrate key features of a broader shift to a mode of data colonialism based on datafication and AI orchestration This book analyses 48 in depth and mediated interviews forums blogs and official statements made by dating apps It situates this transition within the broader culture of data colonialism through close readings of science fiction suggesting the world has become like *Us* where doppelgangers constituted from reprehensible proclivities have emerged as digital profiles reflected back to users through the horrific play of social media mirrors to govern their encounters against their wishes These mirrors allow media companies to conduct surreptitious experiments on users dispossessed desires devise digital doppelgangers from those they

disavow and compel behaviors that are lucrative precisely because they are misaligned with humane values Yet this horrific play of mirrors is not inevitable By attending to the ghosts of colonialism unleashed by media companies through the approach developed in this book it is still possible to galvanize the collective will to combat data colonialism and strive to create a world where love disentangled from colonial modes of desire is possible This study will interest scholars attempting to understand the rapidly evolving ecology of dating apps within the areas of digital media media sociology cultural studies anthropology and media and communication studies Buddhism and the Coronavirus Jeaneane Fowler,2021-01-07 This book examines the early teachings of Buddhism associated with the life of the Buddha Siddhatta Gotama In these teachings the Buddha put forward his famous Four Noble Truths concerning the nature of suffering its causes the Truth that it can be overcome and a pathway to end suffering The suffering experienced in the contemporary coronavirus pandemic may seem to be very distant from the Buddhas message delivered over two thousand years ago but the teaching of the Four Noble Truths is as relevant today as it was all that time ago So this book melds the two occasionally with discrete treatment of past and present but ever cognizant of the ways in which the teachings of the past inform the present crisis To understand coronaviruses the book examines the nature of viruses their origins causes and the ways in which they are both friends and enemies of humankind Importantly and crucially the book investigates how far humanity itself is the cause of its own suffering in the pandemics that arise no less in the coronaviruses that have emerged in the twenty first century Chapters include The Buddha Viruses Friends and Enemies The Noble Truth of Suffering The Second Noble Truth of the Cause of Suffering The Third Noble Truth of the Cessation of Suffering The Fourth Noble Truth The Noble Eightfold Path The Noble Eightfold Path Mindfulness and Concentration The Brahma vihara Love Compassion Sympathetic Joy Equanimity
