Samoilenko,Martijn Icks,Jennifer Keohane,Eric Shiraev,2019-12-05 In modern politics as well as in historical times character attacks abound Words and images like symbolic and psychological weapons have sullied or destroyed numerous reputations

People mobilize significant material and psychological resources to defend themselves against such attacks How does character assassination work and when does it not Why do many targets fall so easily when they are under character attack How can one prevent attacks and defend against them The Routledge Handbook of Character Assassination and Reputation Management offers the first comprehensive examination of character assassination Moving beyond studying corporate reputation management and how public figures enact and maintain their reputation this lively volume offers a framework and cases to help understand critically analyze and effectively defend against such attacks Written by an international and interdisciplinary team of experts the book begins with a theoretical introduction and extensive description of the five pillars of character assassination 1 the attacker 2 the target 3 the media 4 the public and 5 the context The remaining chapters present engaging case studies suitable for class discussion These include Roman emperors Reformation propaganda the Founding Fathers defamation in US politics women politicians autocratic regimes European leaders celebrities nations Internet campaigns This handbook will prove invaluable to undergraduate and postgraduate students in communication political science history sociology and psychology departments It will also help researchers become independent critical and informed thinkers capable of avoiding the pressure and manipulations of the media

Evolution and Popular Narrative

,2019-06-07 The contributors to this volume share the assumption that popular narrative when viewed with an evolutionary lens offers an incisive index into human nature In theory narrative art could take a near infinity of possible forms In actual practice however particular motifs plot patterns stereotypical figures and artistic devices persistently resurface indicating specific predilections frequently at odds with our actual living conditions Our studies explore various media and genres to gauge the impact of our evolutionary inheritance in interdependence with the respective cultural environments on our aesthetic appreciation As they suggest research into mass culture is not only indispensable for evolutionary criticism but may also contribute to our understanding of prehistoric selection pressures that still influence modern preferences in popular narrative Contributions by David Andrews James Carney Mathias Clasen Brett Cooke Tam s D vid Barrett Tom Dolack Kathryn Duncan Isabel Behncke Izquierdo Joe Keener Alex C Parrish Todd K Platts Anna Rotkirch Judith P Saunders Michelle Scalise Sugiyama Dirk Vanderbeke and Sophia Wege
