The Handbook of Collective Violence Carol A. Ireland, Michael Lewis, Anthony Lopez, Jane L. Ireland, 2020-04-22 The first of its kind The Handbook of Collective Violence covers a range of contexts in which collective violence occurs bringing together international perspectives from psychology criminology and sociology into one complete volume There have been significant advances made in the last 25 years regarding how collective violence is conceptualised and understood with a move away from focusing on solely individual forms of violence toward examining and understanding violence that can occur within groups This handbook presents some of the most interesting topics within the area of collective violence drawing upon international expertise and including some of the most well known academics and practitioners of our generation Structured into four parts understanding war terrorism public order and organized violent crime and gang and multiple offender groups this volume provides academics and practitioners with an up to date resource that covers core areas of interest and application Accessibly written it is ideal for both academics and policymakers alike capturing developments in the field and offering a deep theoretical insight to enhance our understanding of how such collective violence evolves alongside practical suggestions for management prevention and intervention

Animal Personalities Claudio Carere, Dario Maestripieri, 2024-05-31 Ask anyone who has owned a pet and they'll assure you that yes animals have personalities And science is beginning to agree Researchers have demonstrated that both domesticated and nondomesticated animals from invertebrates to monkeys and apes behave in consistently different ways meeting the criteria for what many define as personality But why the differences and how are personalities shaped by genes and environment How did they evolve The essays in Animal Personalities reveal that there is much to learn from our furred and feathered friends The study of animal personality is one of the fastest growing areas of research in behavioral and evolutionary biology Here Claudio Carere and Dario Maestripieri along with a host of scholars from fields as diverse as ecology genetics endocrinology neuroscience and psychology provide a comprehensive overview of the current research on animal personality Grouped into thematic sections chapters approach the topic with empirical and theoretical material and show that to fully understand why personality exists we must consider the evolutionary processes that give rise to personality the ecological
