Social Learning In Animals Cecilia M. Heyes, Bennett G. Galef Jr., 1996-05-23 The increasing realization among behaviorists and psychologists is that many animals learn by observation as members of social systems Such settings contribute to the formation of culture This book combines the knowledge of two groups of scientists with different backgrounds to establish a working consensus for future research The book is divided into two major sections with contributions by a well known international and interdisciplinary team which integrates these growing areas of inquiry Integrates the broad range of scientific approaches being used in the studies of social learning and imitation and society and culture Provides an introduction to this field of study as well as a starting point for the more experienced researcher Chapters are succinct reviews of innovative discoveries and progress made during the past decade Includes statements of varied theoretical perspectives on controversial topics Authoritative contributions by an international team of leading researchers **The Neural Basis of Hyper-Adaptability in Humans and Animals** Jun Izawa, Jun Ota, Tomohiko Takei, Belén Rubio Ballester, 2023-03-28 *Survey of Compounds which Have Been Tested for Carcinogenic Activity* Philippe Shubik, Jonathan Lutton Hartwell, 1957 **Animals in Stone** Alexandra Anna Enrica van der Geer, 2008 This magnificently illustrated study of a vast amount of South Asian animal stone sculptures provides an art history covering almost four and a half thousand years analyzing the art historical archeological and cultural context of animals in society **Animals and the Environment** Lisa Kemmerer, 2015-05-01 Contemporary Earth and animal activists rarely collaborate perhaps because environmentalists focus on species and ecosystems while animal advocates look to the individual and neither seems to have much respect for the other This diverse collection of essays highlights common ground between earth and animal advocates most notably the protection of wildlife and personal dietary choice If earth and animal advocates move beyond philosophical differences and resultant divergent priorities turning attention to shared goals both will be more effective and both animals and the environment will benefit Given the undeniable seriousness of the environmental problems that we face including climate change and species extinction it is essential that activists join forces Drawing on a wide range of issues and

disciplines ranging from wildlife management hunting and the work of NGOs to ethics ecofeminism religion and animal welfare this volume provides a stimulating collection of ideas and challenges for anyone else who cares about the environment or animals
