Austronesian Root Theory Austronesian Root Theory:

Austronesian Root Theory R. A. Blust, 1988 Since the pioneering analyses of Renward Brandstetter 1860 1942 a quasi morphological element called the root has been recognized in Austronesian linguistics This monograph confronts many of the methodological and substantive issues raised but never fully resolved by Brandstetter In an effort to reassess the value of his work for contemporary linguistics the author examines Brandstetter's methods and results and applies a modified form of this approach to new material The study establishes 230 roots based on more than 2 560 root tokens in some 117 languages It is thus intended to serve as a rudimentary root dictionary and a basic handbook on the subject of the root for future scholars of Austronesian

The Austronesian Languages of Asia and Madagascar K. Alexander Adelaar, Nikolaus Himmelmann, 2005 An essential source of reference for this linguistic community as well as for linguists working on typology and syntax

Linguistic Change and Reconstruction Methodology Philip Baldi, 2011-06-01 No detailed description available for Linguistic Change and Reconstruction Methodology Language Universals, Markedness Theory, and Natural Phonetic Processes Robert K. Herbert, 2011-06-01 TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language The series publishes state of the art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by building bridges to neighbouring fields such as neuroscience and cognitive science TRENDS IN LINGUISTICS considers itself a forum for cutting edge research based on solid empirical data on language in its various manifestations including sign languages It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints High quality standards are ensured through anonymous reviewing

Investigations of the Syntax-Semantics-Pragmatics Interface Robert D. Van Valin, Jr., 2008-11-21 Investigations of the Syntax Semantics Pragmatics Interface presents on going research in Role and Reference Grammar in a number of critical areas of linguistic theory verb semantics and argument structure the nature of syntactic categories and syntactic representation prosody and syntax information structure and syntax and the syntax and semantics of complex sentences In each of these areas there are important results which not only advance the development of the theory but also contribute to the broader theoretical discussion In particular there are analyses of grammatical phenomena such as transitivity in Kabardian the verb less numeral quantifier construction in Japanese and an unusual kind of complex sentence in Wari Chapakuran Brazil which not only illustrate the descriptive and explanatory power of the theory but also present interesting challenges to other approaches In addition there are papers looking at the implications and applications of Role and Reference Grammar for neurolinguistic research parsing and automated text analysis

The Semantics of Grammar

Anna Wierzbicka, 1988-01-01 The semantics of grammar presents a radically semantic approach to syntax and morphology. It offers a methodology which makes it possible to demonstrate on an empirical basis that syntax is neither autonomous nor arbitrary but that it follows from semantics. It is shown that every grammatical construction encodes a certain semantic structure which can be revealed and rigorously stated so that the meanings encoded in grammar can be compared in a precise and illuminating way within one language and across language boundaries. The author develops a semantic metalanguage based on lexical universals or near universals and ultimately on a system of universal semantic primitives and shows that the same semantic metalanguage can be used for explicating lexical, grammatical and pragmatic aspects of language and thus offers a method for an integrated linguistic description based on semantic foundations. Analyzing data from a number of different languages including English, Russian and Japanese, the author explores the notion of ethnosyntax and via semantics links syntax and morphology with culture. She attempts to demonstrate that the use of a semantic metalanguage based on lexical universals makes it possible to rephrase the Humboldt-Sapir-Whorf hypothesis in such a way that it can be tested and treated as a program for empirical research. Aspect and the Categorization of States David Brian Roby, 2009-11-19 In this work the Spanish copulae *ser* and *estar* are argued to be aspectual morphemes. Their binary opposition reflects the universal aspectual values Perfective which are the same ones overtly expressed by the preterite and imperfect past tense forms in Spanish. It can therefore be shown that different types of states just like different types of events can be categorized based on their aspectual composition. Additionally, the inherent semantic differences between events and states can be accounted for by analyzing aspect as applying to events internally and to states externally. A useful resource for the beginning linguist as well as the most seasoned analyst, this work is written in language that is easy to understand while remaining faithful to all of the appropriate relevant technical terminology. Anyone who is seriously interested in exploring why the Spanish verbs *ser* and *estar* are used the way they are should read this book. *Middle Voice in Modern Greek* Linda Joyce Manney, 2000 This book provides an in-depth analysis of the inflectional middle category in Modern Greek. Against the theoretical backdrop of cognitive linguistics, it is argued that a wide range of seemingly disparate middle structures in Modern Greek comprise a complex semantic network and that this network is organized around two prototypical middle event types which are noninitiative emotional response and spontaneous change of state. In those cases where middle structures have active counterparts, middle and active variants of the same verb stem are compared in order to demonstrate more clearly the semantic distinctions and pragmatic functions encoded by inflectional middle voice in Modern Greek. Major semantic groupings of middle structures treated include emotional response in particular and psycho-emotive experience in general, spontaneous change of state and/or the resulting state-agent induced events in which an agent-subject is emotionally involved with or affected by some aspect of the designated situation, passive-like events in which a patient-subject is affected by a nonfocal agent implicit or specified, and reflexive-like events in which a patient-subject and an

unspecified agent may overlap to varying degrees *Circum-Baltic Languages* Östen Dahl, Maria

Koptjevskaja-Tamm, 2001-12-31 The area around the Baltic Sea has for millennia been a meeting place for people of different origins Among the circum Baltic languages we find three major branches of Indo European Baltic Germanic and Slavic the Baltic Finnic languages from the Uralic phylum and several others The circum Baltic area is an ideal place to study areal and contact phenomena in languages The present set of two volumes look at the circum Baltic languages from a typological areal and historical perspective trying to relate the intricate patterns of similarities and dissimilarities to the societal background In Volume II selected phenomena in the grammars of the circum Baltic languages are studied in a cross linguistic perspective

Linguistic Borrowing in Bilingual Contexts Fredric Field, 2002-12-13 A number of previous approaches to linguistic borrowing and contact phenomena in general have concluded that there are no formal boundaries whatsoever to the kinds of material that can pass from one language into another At the same time various hierarchies illustrate that some things are indeed more likely to be borrowed than others *Linguistic Borrowing in Bilingual Contexts* addresses both by examining claims of no absolute limits and synthesizing various hierarchies It observes that all contact phenomena are systematic and borrowing is no exception Regarding forms the determining factors lie in the nature of the morphological systems in contact and how they relate to one another Two principles are proposed to determine the nature of the systematicity and interaction the Principle of System Compatibility PSC and its corollary the Principle of System Incompatibility PSI Together these principles provide a consistent account of the possibilities and limits to borrowing
