

Autofocus Fine Tuning Target

Instructions

1. Place this target on a well-lit floor.
2. Mount camera on tripod, at a distance of approximately 25 to 50 times the focal length of the lens being tested.
3. Aim camera at target at an angle of roughly 30 - 45 degrees.
4. Use autofocus on lines within rectangle.
5. Make several shots.
6. Examine the pix.
7. If central lines are not the sharpest, adjust the fine tuning of camera to shift the autofocus.
8. Rinse and repeat.

Applied Photographic Optics Sidney Ray, 2002-02-20 Selected by the American Library Association's Choice magazine as best technical book the first edition of this book soon established itself as the standard reference work on all aspects of photographic lenses and associated optical systems This is unsurprising as Sidney Ray provides a complete comprehensive reference source for anyone wanting information on photographic lenses from the student to the practitioner or specialist working with visual and digital media worldwide This third edition has been fully revised and expanded to include the rapid progress in the last decade in optical technology and advances in relevant electronic and digital forms of imaging Every chapter has been revised and expanded using new figures and photographs as appropriate as well as extended bibliographies New chapters include details of filters measurements from images and the optical systems of digital cameras Details of electronic and digital imaging have been integrated throughout More information is given on topics such as aspherics diffractive optics ED glasses image stabilization optical technology video projection and new types of lenses A selection of the contents includes chapters on optical theory aberrations auto focus lens testing depth of field development of photographic lenses general properties of lenses wide angle lenses telephoto lenses video lenses viewfinder systems camera movements projection systems and 3 D systems [The Lens](#) NK Guy, 2012-10-08 Which lens should I buy for my camera It's such a

simple question but choosing the right lens or lenses is actually one of the most important photographic decisions you can make Nothing affects the quality of a photo more than the lens It's no longer just about the megapixels it's the glass that makes all the difference Many first time buyers of DSLRs don't venture past the basic lens included in the box While some are reluctant to spend more money others are confused by all the buzzwords or are overwhelmed by all the choices out there It's really a shame because interchangeable lenses give you amazing scope for quality photography Take in vast sweeping scenes with a wide angle lens Capture faraway birds with a telephoto lens Examine the tiniest detail of a flower with a macro lens Record the perfect portrait with a prime lens Anything is possible when you choose the right lens for the job This book isn't a simple catalogue of available lenses New products are coming out all the time and comparing specific lenses can be difficult Instead author N K Guy gives you all the information you need to make smart buying decisions Optical technology is demystified arcane terminology is decoded and practical tips are provided The Lens will help you build the perfect lens collection to suit your needs now and in the future
