Software Engineering Ahmed Seffah, Jean Vanderdonckt, Michel C. Desmarais, 2009-06-19 Activity theory is a way of describing and characterizing the structure of human activity of all kinds First introduced by Russian psychologists Rubinshtein Leontiev and Vigotsky in the early part of the last century activity theory has more recently gained increasing attention among interaction designers and others in the human computer interaction and usability communities see for example Gay and H Brooke 2004 Interest was given a significant boost when Donald Norman suggested activity theory and activity centered design as antidotes to some of the putative ills of human centered design Norman 2005 Norman who has been credited with coining the phrase user centered design suggested that too much attention focused on human users may be harmful that to design better tools designers need to focus not so much on users as on the activities in which users are engaged and the tasks they seek to perform within those activities Although many researchers and practitioners claim to have used or been influenced by activity theory in their work see for example Nardi 1996 it is often difficult to trace precisely where or how the results have actually been shaped by activity theory In many cases

even detailed case studies report results that seem only distantly related if at all to the use of activity theory Contributing to the lack of precise and traceable impact is that activity theory spite its name is not truly a formal and proper theory *The*
