Authenticity In Nature Making Choices About The Naturalness Of Ecosystems

Fausto O. Sarmiento, Larry M. Frolich

Authenticity In Nature Making Choices About The Naturalness Of Ecosystems:

Authenticity in Nature Nigel Dudley, 2012-03-12 This book examines the concept of naturalness in ecosystems discusses its values and considers choices about the level of naturalness in conservation efforts The author argues that all ecosystems have been modified and the idea of places untouched by humans is a myth But there are large differences in the degree of modification and levels of naturalness which can be identified Changes are not always irreversible some apparent wilderness areas are sites of former civilizations There is no longer any simple distinction possible between natural and cultural systems In the future society will to some extent choose the degree of naturalness in land and seascapes The growth of protected areas is an early sign of this as are changes in forest management dam removal and control of invasive species To make informed choices about these areas the author shows that we must understand the characteristics and values of naturally regulating ecosystems their practical benefits social values and management needs *Authenticity in Nature* uses a rigorous definition of authenticity to help in the understanding and measurement of naturalness It discusses the choices facing us and some of the information we need to make decisions relating to land and water management Practical issues of management and numerous terrestrial and aquatic examples from around the world are discussed It is an optimistic and highly original book aiming to make genuine advances in our understanding and management of natural systems Conserving Cultural

Landscapes Ken Taylor, Archer St. Clair, Nora J. Mitchell, 2014-09-19 New approaches to both cultural landscapes and historic urban landscapes increasingly recognize the need to guide future change rather than simply protecting the fabric of the past Challenging traditional notions of historic preservation *Conserving Cultural Landscapes* takes a dynamic multifaceted approach to conservation It builds on the premise that a successful approach to urban and cultural landscape conservation recognizes cultural as well as natural values sustains traditional connections to place and engages people in stewardship where they live and work It brings together academics within the humanities and humanistic social sciences conservation and preservation professionals practitioners and stakeholders to rethink the meaning and practice of cultural heritage conservation encourage international cooperation and stimulate collaborative research and scholarship **Cultural and**

Spiritual Significance of Nature in Protected Areas Bas Verschuuren, Steve Brown, 2018-08-15 Cultural and spiritual bonds with nature are among the strongest motivators for nature conservation yet they are seldom taken into account in the governance and management of protected and conserved areas The starting point of this book is that to be sustainable effective and equitable approaches to the management and governance of these areas need to engage with people's deeply held cultural spiritual personal and community values alongside inspiring action to conserve biological geological and cultural diversity Since protected area management and governance have traditionally been based on scientific research a combination of science and spirituality can engage and empower a variety of stakeholders from different cultural and religious backgrounds As evidenced in this volume stakeholders range from indigenous peoples and local communities to

those following mainstream religions and those representing the wider public The authors argue that the scope of protected area management and governance needs to be extended to acknowledge the rights responsibilities obligations and aspirations of stakeholder groups and to recognise the cultural and spiritual significance that nature holds for people The book also has direct practical applications These follow the IUCN Best Practice Guidelines for protected and conserved area managers and present a wide range of case studies from around the world including Africa Asia Australia Europe and the Americas

Rethinking the Environment for the Anthropocene Manuel Arias-Maldonado,Zev Trachtenberg,2019-01-15 This book brings together the most current thinking about the Anthropocene in the field of Environmental Political Theory EPT It displays the distinctive contribution EPT makes to the task of thinking through what the environment means in this time of pervasive human influence over natural systems Across its chapters the book helps develop the idea of socionatural relations an idea that frames the environment in the Anthropocene in terms of the interconnected relationship between human beings and their surroundings Coming from both well established and newer voices in the field the chapters in the book show the diversity of points of view theorists take toward the Anthropocene idea and socionatural relations more generally However all the chapters exemplify a characteristic of work in EPT the self conscious effort to provide normative interpretations that are responsive to scientific accounts The Introduction explains the complicated interaction between science and EPT showing how it positions EPT to consider the Anthropocene And the Afterword by a pioneer in the field relates all the chapters to a perspective that has been deeply influential in EPT This book will be of interest to scholars already engaged in EPT But it will also serve as an introduction to the field for students of Political Theory Philosophy Environmental Studies and related disciplines who will learn about the EPT approach from the Introduction and then see it applied to the pressing question of the Anthropocene in the ensuing chapters The book will also help readers interested in the Anthropocene from any disciplinary perspective develop a critical understanding of its political meanings

Terrestrial Ecosystem Research Infrastructures Abad Chabbi, Henry W. Loescher,2017-03-03 Terrestrial Ecosystem Research Infrastructures Challenges and Opportunities reveals how environmental research infrastructures RIs provide new valuable insights on ecological processes that cannot be realized by more traditional short term funding cycles and are integral to understand our changing world This book bonds the latest state of the science knowledge on environmental RIs the challenges in creating them their place in addressing scientific frontiers and the new perspectives they bear Each chapter is thoughtfully invested with fresh viewpoints from the environmental RI vantage as the authors explore and explain many topics such as the rationale and challenges in global change field and modeling platforms new tools challenges in data management distilling information into knowledge and new developments in large scale RIs This work serves an advantageous guide for academics and practitioners alike who aim to deepen their knowledge in the field of science and project management and logistics operations

Routledge Handbook of Ecological and Environmental Restoration

Stuart K. Allison, Stephen D. Murphy, 2017-05-18 Ecological restoration is a rapidly evolving discipline that is engaged with developing both methodologies and strategies for repairing damaged and polluted ecosystems and environments During the last decade the rapid pace of climate change coupled with continuing habitat destruction and the spread of non native species to new habitats has forced restoration ecologists to re evaluate their goals and the methods they use This comprehensive handbook brings together an internationally respected group of established and rising experts in the field The book begins with a description of current practices and the state of knowledge in particular areas of restoration and then identifies new directions that will help the field achieve increasing levels of future success Part I provides basic background about ecological and environmental restoration Part II systematically reviews restoration in key ecosystem types located throughout the world In Part III management and policy issues are examined in detail offering the first comprehensive treatment of policy relevance in the field while Part IV looks to the future Ultimately good ecological restoration depends upon a combination of good science policy planning and outreach all issues that are addressed in this unrivalled volume

Leaving Space for Nature Nigel Dudley, Sue Stolton, 2020-03-23 This book provides the first contemporary assessment of area based conservation and its implications for nature and society Now covering 15 per cent of the land surface and a growing area of ocean the creation of protected areas is one of the fastest conscious changes in land management in history But this has come at a cost including a backlash from human rights organisations about the social impacts of protected areas At the same time a range of new types of area based conservation has emerged based on indigenous people s territories local community lands and a new designation of other effective area based conservation measures This book provides a concise overview of the status and possible futures of area based conservation With many people calling for half the earth s land surface to remain in a natural condition this book taps into the urgent debate about the feasibility of such an aim and the ways in which such land might be managed It provides a timely contribution by people who have been at the centre of the debate for the last twenty years Building on the authors large personal knowledge the book draws on global case studies where the authors have firsthand experience including Yosemite National Park USA Blue Mountains National Park Australia Bwindi National Park Uganda Chingaza National Park Colombia Ustyart Plateau Kazakhstan Snowdonia National Park Wales and many more This book is essential reading for students academics and practitioners interested in conservation and its impact on society

Encyclopedia of Environmental Change John A Matthews, 2013-12-13 Accessibly written by a team of international authors the Encyclopedia of Environmental Change provides a gateway to the complex facts concepts techniques methodology and philosophy of environmental change This three volume set illustrates and examines topics within this dynamic and rapidly changing interdisciplinary field The encyclopedia includes all of the following aspects of environmental change Diverse evidence of environmental change including climate change and changes on land and in the oceans Underlying natural and anthropogenic causes and mechanisms Wide ranging local regional and global impacts from

the polar regions to the tropics Responses of geo ecosystems and human environmental systems in the face of past present and future environmental change Approaches methodologies and techniques used for reconstructing dating monitoring modelling projecting and predicting change Social economic and political dimensions of environmental issues environmental conservation and management and environmental policy Over 4 000 entries explore the following key themes and more Conservation Demographic change Environmental management Environmental policy Environmental security Food security Glaciation Green Revolution Human impact on environment Industrialization Landuse change Military impacts on environment Mining and mining impacts Nuclear energy Pollution Renewable resources Solar energy Sustainability Tourism Trade Water resources Water security Wildlife conservation The comprehensive coverage of terminology includes layers of entries ranging from one line definitions to short essays making this an invaluable companion for any student of physical geography environmental geography or environmental sciences **Rethinking Nature** Aurélie Choné, Isabelle

Hajek, Philippe Hamman, 2017-05-18 This textbook provides an overview of different ways of conceptualising nature in epistemological terms reflecting the tensions between the polarities of humans as masters or protectors of nature or as part of or outside of nature The Elgar Companion to Geography, Transdisciplinarity and Sustainability Fausto O.

Sarmiento, Larry M. Frolich, 2020-05-29 With contributions from top geographers this Companion frames sustainability as exemplar of transdisciplinary science critical geography while improving future scenarios debating perspectives between rich North poor South modern urban backwards rural and everything in between The Companion has five sections that carry the reader from foundational considerations to integrative trends to resources use and accommodation to examples highlighting non traditional pathways to a postscript about cooperation of the industrialized Earth and a prognosis of the road ahead for the new geographies of sustainability

Authenticity In Nature Making Choices About The Naturalness Of Ecosystems: Bestsellers in 2023 The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous engrossing novels captivating the hearts of readers worldwide. Lets delve into the realm of popular books, exploring the engaging narratives that have captivated audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This heartfelt tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can triumph. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This captivating coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These top-selling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and thrilling novel that will keep you wondering until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
