Beyond Internet Unplugging Routledge Information:

Beyond the Internet Rita Figueiras, Paula do Espírito Santo, 2015-12-22 The western economic and financial crisis began with the collapse of Lehman Brothers in 2008 and led the European Union countries into recession After this governments started to implement austerity measures such as cuts in public spending including public subsidies and jobs and rising prices In this context Europe started to experience a wave of protest movements Individuals started to use the manifold interactive digital media environment to both fight against the austerity measures and find alternative ways of claiming their democratic rights Inspired by the 2011 Arab Spring and the Occupy Wall Street movement in New York USA the Occupy LSX encampment in Central London UK The Outraged Los Indignados 15M encampment in Central Madrid Spain the Syntagma Square s Outraged movement in Athens Greece and the March 12th Movement in Lisbon Portugal although short lived epitomize an emerging alternative politics and participation via the media This wave has promoted a debate on how the realm of politics is changing as citizens broaden their ideas of what political issues and participation mean Beyond the Internet examines the technological dimension of the recent wave of protest movements in the United Kingdom Spain Portugal Greece and Ireland Offering an opportunity to achieve a better understanding of the dynamics between society politics and technology this volume questions the essentialist attributes of the Internet that fuel the techno centric discourse The contributors illustrate how all these protest movements were active in the social media and garnered high levels of media attention and public visibility in spite of their failure to achieve their political goals As intra elite dissent was pivotal in understanding the Arab uprisings the coalition of national ruling elites with European institutions in terms of austerity strategy is essential in understanding the limits of media technology power and therefore the dissociation between communication and representative power

Protest Technologies and Media Revolutions Athina Karatzogianni, Michael Schandorf, Ioanna Ferra, 2020-11-26 Contains an Open Access chapter With chapters spanning from the Russian Revolution to the present day this book considers how art media and communication technologies have been operationalised to connect mobilise organize and inspire the masses in particular national political and economic contexts

Foundations of Global Communication Kai Hafez, Anne Grüne, 2022-05-30 This book provides a wide ranging theoretical and empirical overview of the disparate achievements and shortcomings of global communication This exceptionally ambitious and systematic project takes a critical perspective on the globalization of communication Uniquely it sets media globalization alongside a plethora of other globalized forms of communication ranging from the individual to groups civil society groupings commercial enterprises and political formations The result is a sophisticated and impressive overview of globalized communication across various facets assessing the phenomena for the extent to which they live up to the much hyped claims of globalization s potential to create a globally interdependent society The setbacks of globalization such as right wing populism and religious fundamentalism can only be understood if the shortcomings of global communication are taken more seriously Covering all

types of cross border global communication in media political and economic systems civil societies social media and lifeworlds of the individual this unique book is invaluable for students and researchers in media communication globalization and related areas Infrastructure Communication in International Relations Carolijn van Noort,2020-11-09 This book demonstrates how infrastructure projects and the communications thereof are strategized by rising powers to envision progress to enhance the actor s international identity and to substantiate and leverage the actor s vision of international order While the physical aspects of infrastructure are important infrastructure communication in international relations demands more scholarly attention Using a case study approach Carolijn van Noort examines how rising powers communicate about infrastructure internationally and discusses the significance of these communication practices The four case studies include BRICS s summit communications about infrastructure Brazil s infrastructure promises to Africa China s communication of the Belt and Road Initiative in East Africa and Kazakhstan s news media coverage of China s Belt and Road Initiative Van Noort highlights the fact that the link between infrastructure identity and order making is arbitrary and thus contested in practice with rising powers operationalizing infrastructure communication in international relations in varied ways She argues that both communication organization and the visibility of strategic narratives on infrastructure influence the international communication of infrastructure vision and action plans with different levels of success Infrastructure Communication in International Relations is a welcome and timely book of interest to students and scholars in the fields of international relations global communications and the politics of infrastructure The Politics of Data Transfer Yuko Suda,2017-11-22 In this book Yuko Suda examines the Safe Harbor debate the passenger name record PNR dispute and the Society for Worldwide Interbank Financial Transactions SWIFT affair to understand the transfer of personal data from the European Union EU to the United States She argues that the Safe Harbor PNR and SWIFT agreements were made to mitigate the potentially negative effects that may arise from the beyond the border reach of EU data protection rules or US counterterrorism regulation A close examination of these high profile cases would reveal how beyond the border reach of one jurisdiction s regulation might affect another jurisdiction s policy and what responses the affected jurisdiction possibly makes to manage the effects of such extraterritorial regulation The Politics of Data Transfer adds another dimension to the study of transatlantic data conflicts by assuming that the cases exemplify not only the politics of data privacy but also the politics of extraterritorial regulation A welcome and timely collection uncovering the evolution of and prospects for the politics of data privacy in the digitalized and interconnected world **Disconnecting with Social Networking Sites** B. Light,2014-09-26 Ben Light puts forward an alternative way of thinking about how we engage with social networking sites He analyses our engagements social networking sites in public at work in our personal lives and as related to our health and wellbeing emphasizing the importance of disconnection instead of connection Beyond Consumer Capitalism Justin Lewis,2014-01-24 Consumer capitalism dominates our economy our politics and our culture Yet there is a growing body of

research from a range of disciplines that suggests that consumer capitalism may be past its sell by date Beyond Consumer Capitalism begins by showing how for people in the developed world consumer capitalism has become economically and environmentally unsustainable and is no longer able to deliver its abiding promise of enhancing quality of life This cutting edge book then asks why we devote so little time and effort to imagining other forms of human progress The answer Lewis suggests is that our cultural and information industries limit rather than stimulate critical thinking keeping us on the treadmill of consumption and narrowing our vision of what constitutes progress If we are to find a way out of this cul de sac Lewis argues we must begin by analysing the role of media in consumer capitalism and changing the way we organize media and communications We need a cultural environment that encourages rather than stifles new ideas about what guides our economy and our society Timely and compelling Beyond Consumer Capitalism will have strong appeal to students and scholars of media studies cultural studies and consumer culture

Political Communication in Real Time Dan Schill, Rita Kirk, Amy E. Jasperson, 2016-10-04 Much has been made of the speed and constancy of modern politics Whether watching cable news retweeting political posts or receiving news alerts on our phones political communication now happens continuously and in real time Traditional research methods often do not capture this dynamic environment Early studies that guided the study of political communication took place at a time when transistors and FM radio television and widely distributed films technologically changed the way people gained information and developed knowledge of the world around them Now the environment has transformed again through digital innovations This book provides one of the first systematic assessment of real time methods used to study the new digital media environment It features twelve chapters authored by leading researchers in the field using continuous or real time response methods to study political communication in various forms Moreover the authors explain how viewer attitudes can be measured over time message effects can be pin pointed down to the second of impact behaviors can be tracked and analyzed unobtrusively and respondents can naturally respond on their smartphone tablet or even console gaming system Leading practitioners in the field working for CNN Microsoft and Twitter show how the approach is being innovatively used in the field Political Communication in Real Time is a welcome addition to the growing field of interest in big data and continuous response research This volume will appeal to scholars and practitioners in political science and communication studies wishing to gain new insights into the strengths and limitations of this approach Political communication is a continuous process so theories applications and cognitive models of such communication require continuous measures and methods

Web link analysis and interviews with leading figures in grassroots groups on both sides of the Atlantic Filippo Trevisan reveals the profound impact that the Internet has had on disability advocacy in the wake of the austerity agenda that followed the 2008 global financial crisis In Britain a new tech savvy generation of young disabled self advocates has emerged from this process The role of social media platforms such as Facebook in helping politically inexperienced users make sense of complex policy changes through the use of personal stories is discussed also In addition this book explains why British disability advocates adopted more innovative and participatory strategies compared to their American counterparts when faced with similar policy crises This book reviews the implications of this unexpected digital transformation for the structure of the disability rights movement its leadership and the opportunity for disabled citizens to participate fully in democratic politics vis vis persisting Web access and accessibility barriers An original perspective on the relationship between disability and the Internet and an indispensable read for scholars wishing to contextualize and enrich their knowledge on digital disability rights campaigns vis vis the broader ecology of policymaking

Media Relations of the Anti-War Movement

Ian Taylor, 2017-01-06 In this book Ian Taylor examines how a social movement the anti Iraq War movement in the UK engaged with the media as a part of their campaigning against the invasion and occupation of Iraq Moving beyond content analysis to draw upon interviews with locally based journalists and activists Taylor examines how locally based anti war groups engaged with their local press as well as how those groups were reported on by the local press in their respective areas In the process of exploring these ideas the book takes on questions like How did local journalists assess the legitimacy of the anti war movement How why and to what extent did opponents of the war pursue local press coverage What bearing did the social composition of the movement have on the way they set about engaging with the media How did the local press handle the controversy surrounding opposition to military action against Iraq Media Relations of the Anti War Movement makes a unique contribution to research on the interactions between social movements and the media and plugs a major gap in the literature on the Iraq War and the media
