Beyond The Edge New Yorks New Waterfront:

Beyond the Edge Raymond Gastil, 2002-10-25 Through an insightful look at projects from around the world and at the current design proposals for New York itself the author paints a portrait of redevelopment that is both pragmatic and visionary one that holds the promise of reconnecting New Yorkers to their waterfront as a vital place of work and of public life **BOOK JACKET** **Cruising the Dead River** Fiona Anderson, 2019-10-14 In the 1970s Manhattan's west side waterfront was a forgotten zone of abandoned warehouses and piers Though many saw only blight the derelict neighborhood was alive with queer people forging new intimacies through cruising Alongside the piers sexual and social worlds artists produced work attesting to the radical transformations taking place in New York Artist and writer David Wojnarowicz was right in the heart of it documenting his experiences in journal entries poems photographs films and large scale site specific projects In **Cruising the Dead River** Fiona Anderson draws on Wojnarowicz's work to explore the key role the abandoned landscape played in this explosion of queer culture Anderson examines how the riverfront's ruined buildings assumed a powerful erotic role and gave the area a distinct identity By telling the story of the piers as gentrification swept New York and before the AIDS crisis Anderson unearths the buried histories of violence regeneration and LGBTQ activism that developed in and around the cruising scene **Activating Urban Waterfronts** Quentin Stevens, 2020-12-14 **Activating Urban Waterfronts** shows how urban waterfronts can be designed managed and used in ways that can make them more inclusive lively and sustainable The book draws on detailed examination of a diversity of waterfronts from cities across Europe Australia and Asia illustrating the challenges of connecting these waterfront precincts to the surrounding city and examining how well they actually provide connection to water The book challenges conventional large scale long term approaches to waterfront redevelopment presenting a broad re thinking of the formats and processes through which urban redevelopment can happen It examines a range of actions that transform and activate urban spaces including informal appropriations temporary interventions co design creative programming of uses and adaptive redevelopment of waterfronts over time It will be of interest to anyone involved in the development and management of waterfront precincts including entrepreneurs the creative industries community organizations and most importantly ordinary users **The Encyclopedia of New York State** Peter Eisenstadt, 2005-05-19 **The Encyclopedia of New York State** is one of the most complete works on the Empire State to be published in a half century In nearly 2 000 pages and 4 000 signed entries this single volume captures the impressive complexity of New York State as a historic crossroads of people and ideas as a cradle of abolitionism and feminism and as an apex of modern urban suburban and rural life The Encyclopedia is packed with fascinating details from fields ranging from sociology and geography to history Did you know that Manhattan's Lower East Side was once the most populated neighborhood in the world but Hamilton County in the Adirondacks is the least densely populated county east of the Mississippi New York is the only state to border both the Great Lakes and the Atlantic Ocean the Erie Canal opened New

York City to rich farmland upstate and to the west Entries by experts chronicle New York's varied areas politics and persuasions with a cornucopia of subjects from environmentalism to higher education to railroads weaving the state's diverse regions and peoples into one idea of New York State Lavishly illustrated with 500 photographs and figures 120 maps and 140 tables the Encyclopedia is key to understanding the state's past present and future It is a crucial reference for students teachers historians and business people for New Yorkers of all persuasions and for anyone interested in finding out more about New York State

Transforming Urban Waterfronts Gene Desfor, Jennefer Laidley, Quentin Stevens, Dirk Schubert, 2010-10-04 In port cities around the world waterfront development projects have been hailed both as spaces of promise and as crucial territorial wedges in twenty first century competitive growth strategies Frequently these mega projects have been intended to transform derelict docklands into communities of hope with sustainable urban economies economies intended to both compete in and support globally networked hierarchies of cities This collection engages with major theoretical debates and empirical findings on the ways waterfronts transform and have been transformed in port cities in North and South America Europe the Caribbean It is organized around the themes of fixities built environments institutional and regulatory structures and cultural practices and flows information labor capital energy and knowledge which are key categories for understanding processes of change By focusing on these fixities and flows the contributors to this volume develop new insights for understanding both historical and current cases of change on urban waterfronts those special areas of cities where land and water meet As such it will be a valuable resource for teaching faculty students and any audience interested in a broad scope of issues within the field of urban studies

Urban heritage in times of uncertainty Dimitra Babalis, 2019-12-30 How should designers respond to urban uncertainty How can we ensure our urban heritage is protected against urban risks and climate change How can we create places that increase urban quality socialisation equity and opportunities for change minimising environmental damages This volume addresses current trends and challenges that explore on how we transform our urban heritage in ways which increase urban resilience embracing innovation and technology Part one provides a critical view in driving forward a new conception of urban transformation that should respond to current concerns around economic social and urban change Part two underscores the importance of the current perception of urban and architectural design that can take into consideration climate change

Bloomberg's New York Julian Brash, 2011-01-15 New York mayor Michael Bloomberg claims to run the city like a business In Bloomberg's New York Julian Brash applies methods from anthropology geography and other social science disciplines to examine what that means He describes the mayor's attitude toward governance as the Bloomberg Way a philosophy that holds up the mayor as CEO government as a private corporation desirable residents and businesses as customers and clients and the city itself as a product to be branded and marketed as a luxury good Commonly represented as pragmatic and nonideological the Bloomberg Way Brash argues is in fact an ambitious reformulation of neoliberal governance that advances specific class

interests He considers the implications of this in a blow by blow account of the debate over the Hudson Yards plan which aimed to transform Manhattan s far west side into the city s next great high end district Bringing this plan to fruition proved surprisingly difficult as activists and entrenched interests pushed back against the Bloomberg administration suggesting that despite Bloomberg s success in redrawing the rules of urban governance older political arrangements and opportunities for social justice remain

Urban waterfronts and cultural heritage Dimitra Babalis,Tim G. Townshend,2018-03-07

Approaches to urban waterfront conservation have been much debated in recent decades Early schemes focused on leisure and commercial exploitation more recently greater attention has been paid to environmental and ecological conditions historic preservation and human well being But how do we balance these competing interests and yet ensure sustainable change preserve identity and yet allow for new development And how do we involve local people This book aims to provide some answers to these important questions The book is divided into three parts Part One is an overview for regeneration and awareness of historic waterfronts Part Two argues for the sustainable reuse of important sites to preserve their special identity Part Three shows the importance of introducing young researchers to the complexities of designing waterfronts for sustainable lifestyles
