

TEMPERATURE CONTROL AND ADJUSTMENT

Temperature is controlled by the thermostat which is located on the rear wall of the cabinet (see the diagram on page 5). Thermostat knob is located on the indicator light set. "Number 4" is the coldest setting (see the diagram on page 7).

The normal storage temperature of your appliance should be -18°C (0°F). Lower temperatures may be obtained by adjusting the thermostat knob towards 'number 4' position.

We recommend that you check the temperature with a thermometer to ensure that the storage compartments are kept to the desired temperature. Remember you must take your reading very quickly since the thermometer temperature will rise very rapidly after you remove it from the freezer.

Please remember each time the door is opened cold air escapes and the internal temperature rises. Therefore never leave the door open and ensure it is closed immediately after food is put in or removed.

STORING FROZEN FOOD

Prepacked commercially frozen food should be stored in accordance with the frozen food manufacturer's instructions for a **FRIDGEMAN** frozen food storage compartment.

To ensure that the high quality achieved by the frozen food manufacturer and the food retailer is maintained the following should be remembered:

1. Put packets in the freezer as quickly as possible after purchase.
2. Do not exceed "Use By", "Best Before" dates on the packaging.
3. If there are no instructions on the packet, refer to the storage life guide on the door liner.

FREEZING FRESH FOOD

Freezing capacity of your appliance in a 24 hours period is 19 kg (42 lb). Never exceed this maximum capacity.

If you are going to freeze fresh food in excess of 2 kg (4.5 lb) turn on the fast freeze switch and wait about three hours before placing the fresh food in the freezer. Remember to turn off the fast freeze switch.

Fast freeze compartment (7) is shown in diagram. Leave the fast freeze switch on for about 24 hours if the maximum quantity (19 kg / 42 lb) is being frozen. Do not freeze too large a quantity at any one time. The quality of the food is best preserved when it is frozen right through to the centre as quickly as possible. You may place fresh food to be frozen in any part of the freezer.

Take special care not to mix already frozen food and fresh food.

Compartments other than the fast freeze compartment (7) should only be used for storage of frozen food (9). If the fast freeze compartment (7) is filled with fresh food, compartment (8) can also be used to freeze fresh food. Ice bank (6) has been specially designed to obtain ice cubes (see making ice cubes).

1. Indicator light lens (Where fitted)
2. Storage life guide
3. Fast-freeze switch
4. Indicator lights
5. Thermostat knob
6. Ice bank
7. Fast freeze compartment
